GREE-SC 2014

The GENI Research and Educational Experiment Summer Camp
21 – 25 July 2014, Iowa State University, Ames IA

GENI (Global Environment for Network Innovations) provides a virtual laboratory for networking and distributed systems research and education.
(http://www.geni.net)

Join us for a week-long camp and learn how to use GENI in your research and in your classes!

GREE camps provide opportunities to learn and use GENI tools and resources through:

- tutorials and labs
- team-based research projects.

The program lasts for five days, culminating with final team presentations.

Undergraduate, graduate students, and faculty are welcome to apply. Industrial attendees are welcome too. The focus of the camp will be *custom routing protocols*. Hands-on tutorials using several GENI tools will cover the development of custom routing protocols and will also introduce other capabilities of GENI.

Application deadline: May 30, 2013

Application detail: http://groups.geni.net/geni/wiki/APRAGENI/GREE-SC2014

Application submission and inquiries: genisummercamp@gmail.com

Travel grants available!
