

# GENI

## Experimenter Roundtable

### GEC12

Mark Berman, Vic Thomas

November 4, 2011

[www.geni.net](http://www.geni.net)

- GENI is a spiral development effort
  - Early engagement with users and a strong feedback loop is what makes spiral development work
- Feedback should be frank and should be taken in the spirit of friendly advice.
  - “The only thing worse than being talked about is not being talked about.”
- Please don't forget to mention concerns that may seem obvious (or repetitive)
  - This session is not your only chance. Feedback welcomed any time at [help@geni.net](mailto:help@geni.net)

- Session objectives, Mark Berman, GPO
- Experiences with Experimentation with GENI (30 mins)
  - Aaron Gember, University of Wisconsin
  - Ezra Kissel, University of Delaware
  - Aaron Rosen, Clemson U.
- Open discussion
