

GENI

Welcome !

GENI Engineering Conference 15

University of Houston

Chip Elliott
www.geni.net

- **GEC 15: THANK YOU to *Dr. Deniz Gurkan***
- **GEC 16: March 19-21, 2013, in Salt Lake City**
 - *With many thanks to Dr. Rob Ricci*
- Subsequent Meetings, open to all who fit in the room
 - Held at regular 4-month periods; see GENI Wiki for dates / places
 - Geographic rotation through US (central, east, west)
 - Held on / near university campuses – **volunteers?**
 - **Travel grants** for participant diversity (US academics only)

- **Dr. Rathindra N. Bose**

Vice Chancellor for Research and Technology Transfer, UH System
Vice President for Research and Technology Transfer, UH

- Tenured professor in the Department of Chemistry, with previous positions at Ohio, Northern Illinois and Kent State Universities.
- Created a new class of anticancer agents - Phosphaplatins - that exhibits superior efficacy with reduced toxicity in preclinical experiments compared to existing platinum anticancer drugs.
- Currently serves as chair of the Science Advisory Board of Phosplatin Therapeutics, and board member for Bio-Ohio and Southern Ohio Creates Company (SOCC).

- **Dr. Erwin Gianchandani, Deputy Director**

Division of Computer and Network Systems
CISE Directorate
National Science Foundation

Taking stock and looking ahead

The GENI Vision

A national facility to explore radical designs for a future global networking infrastructure

- High capacity backbone and programmable core nodes
- Large clusters of CPUs and storage

- Large, wide-area footprint
- Edge / access technologies (e.g. sensor networks)
- Shared among researchers by virtualization & slices

Be bold! Be creative! Drive the design forward!

All beginnings are difficult . . .
but we think you will get a surprising number of **great**
prototypes and trial systems up and cycling within a year!

www.geni.net

Clearing house for all GENI news and documents

And now it's so close we can taste it

Regional nets

-  Existing
-  New

GENI WiMAX

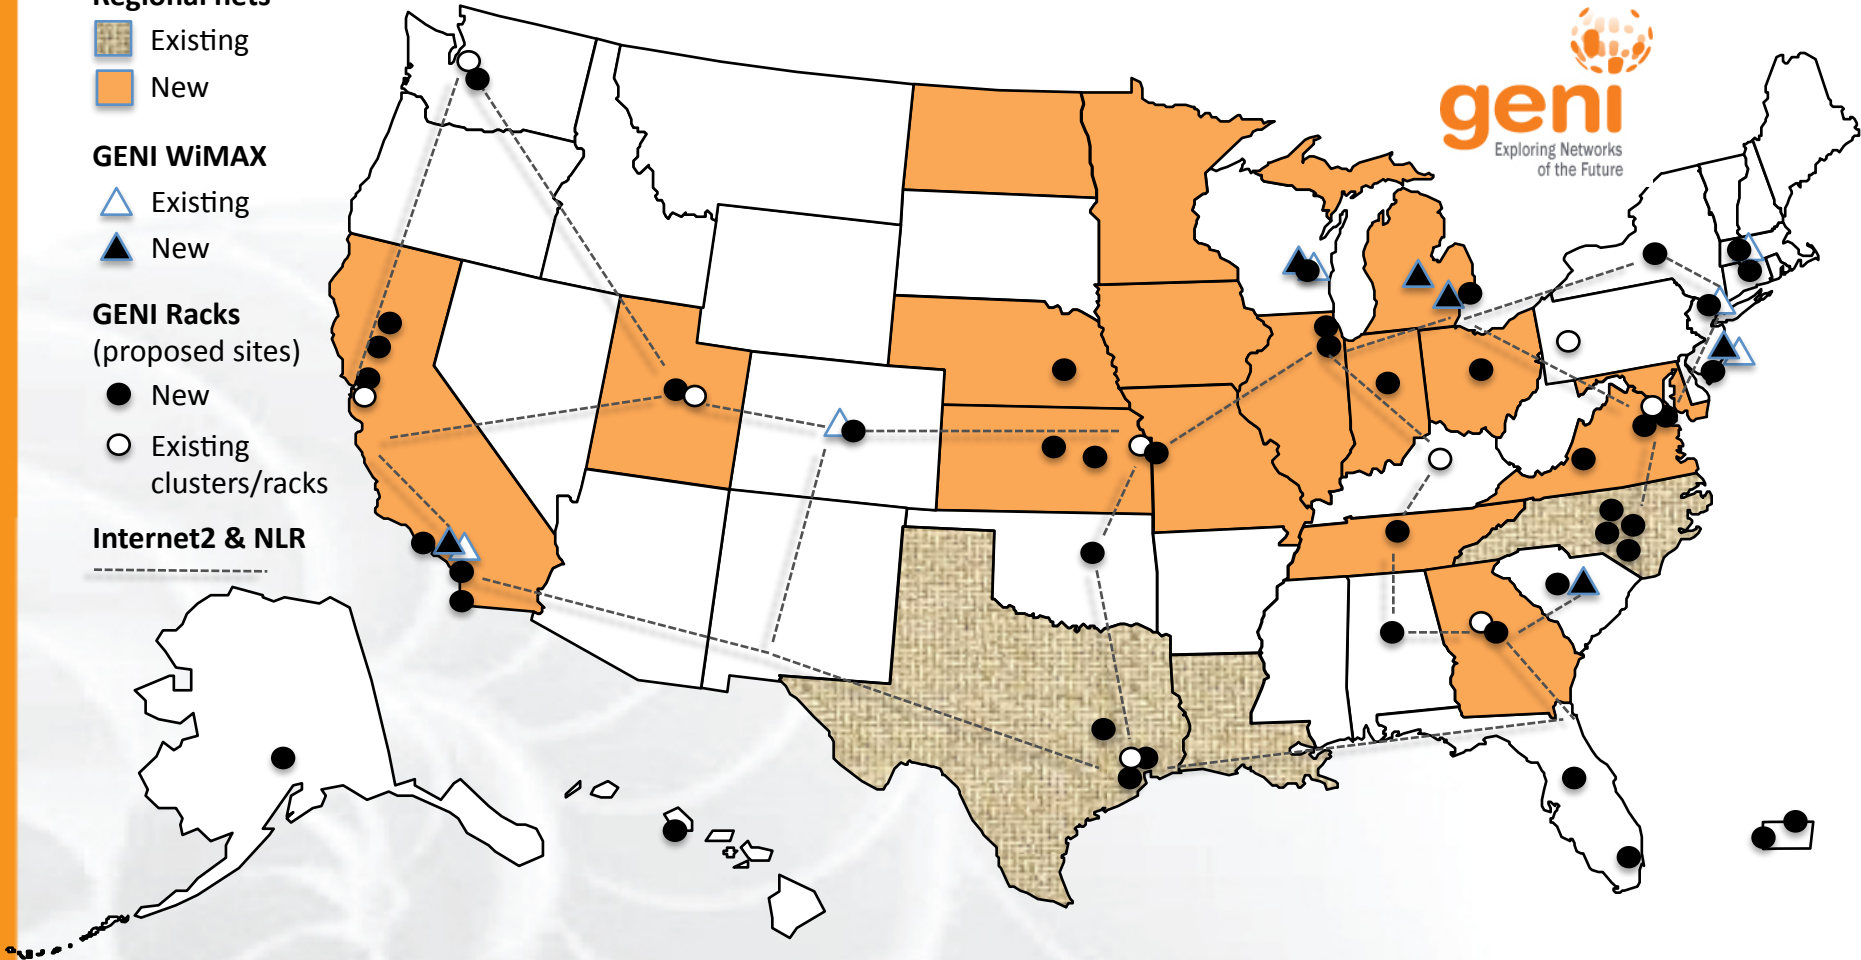

-  Existing
-  New

GENI Racks

(proposed sites)

-  New
-  Existing clusters/racks

Internet2 & NLR

(as proposed; actual footprint to be engineered)

Rapidly growing list of equipment vendors

- **OpenFlow / SDN**

- **GENI racks**

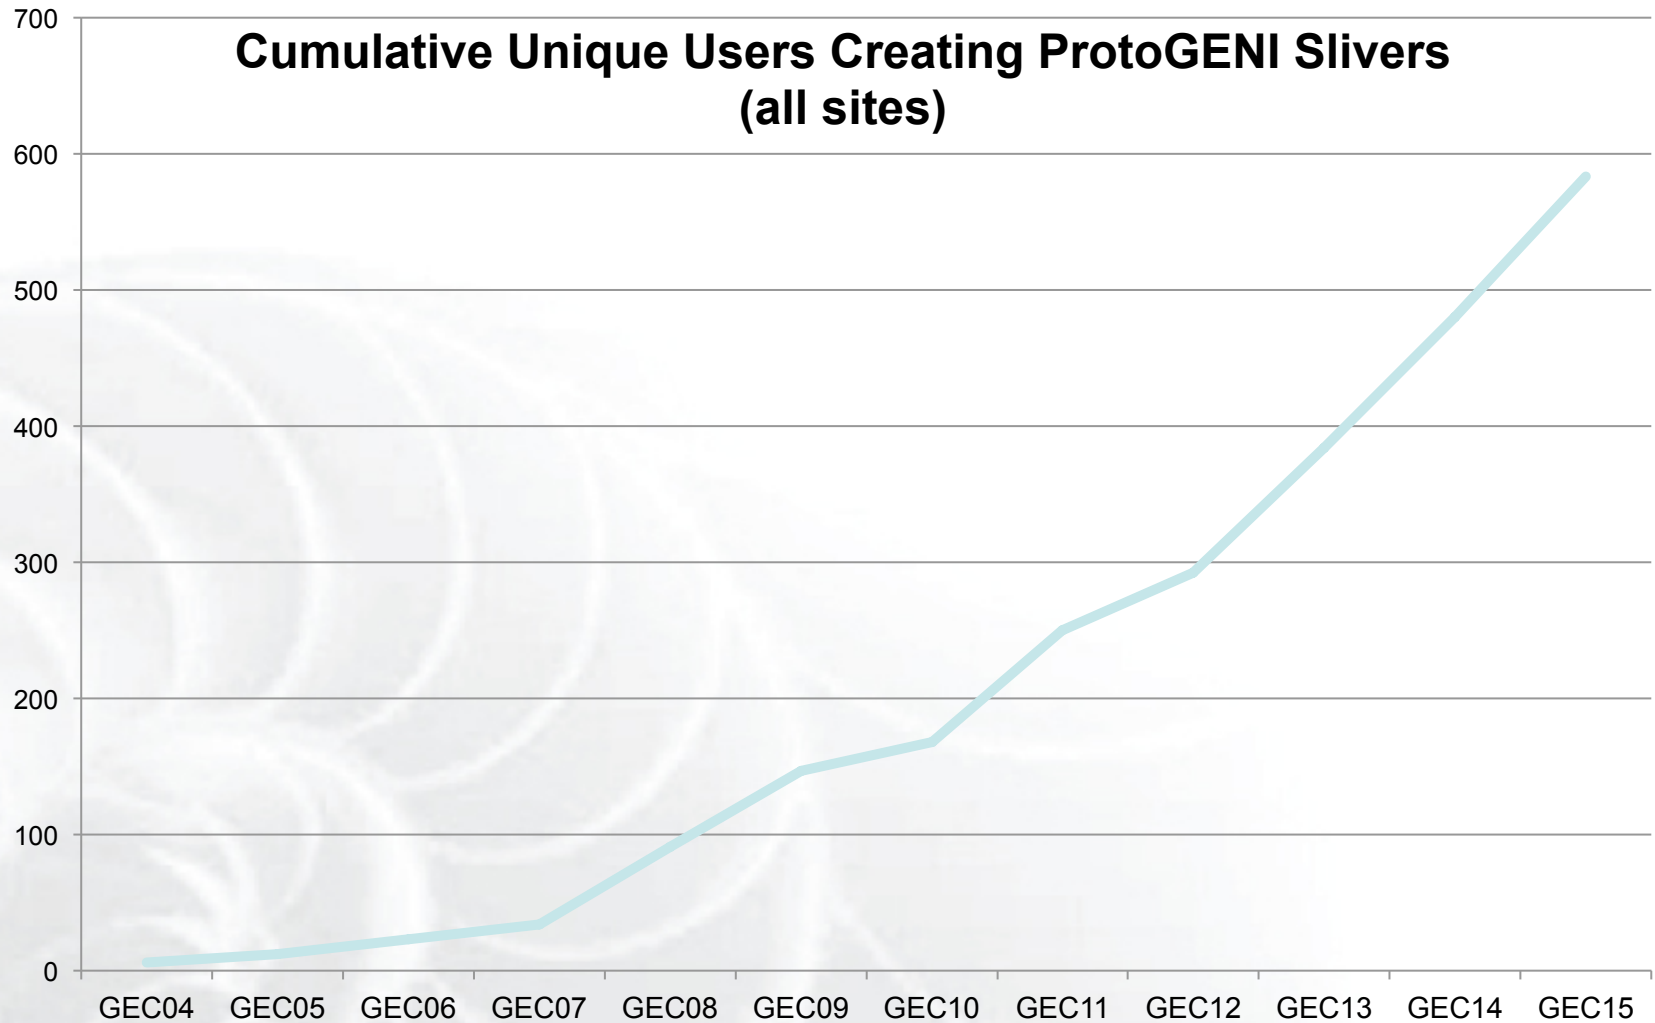

- **WiMAX (-> LTE)**

Alcatel-Lucent

(*some indications)

GENI campus expansion is accelerating

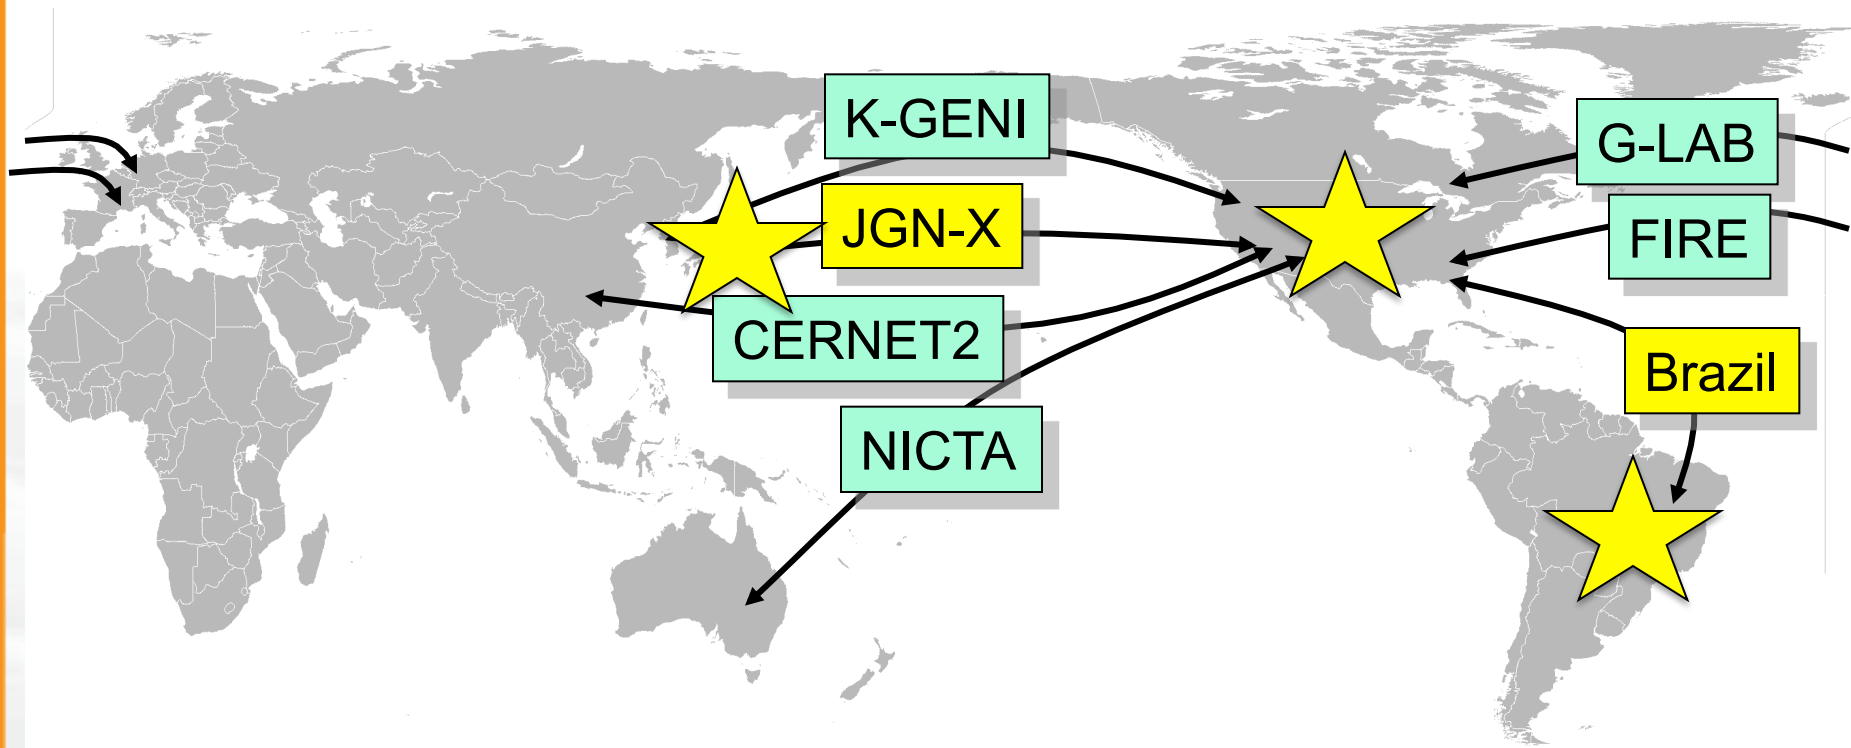

Dr. Larry Landweber, U. Wisconsin

- **“GENI-enabled” means . . .**
OpenFlow + GENI racks, plus
WiMAX on some campuses

- **Very strong interest from university CIOs**
About 60 campus CIOs have expressed strong interest in “GENI-enabling” their campuses
- **NSF’s CC-NIE grants** will enable more than a dozen campuses to immediately start “GENI-enabling” their infrastructure
- **“Spontaneous” GENI deployments**

XIA: a major non-Internet experiment

Similar technologies are now going global

The GENI project is actively collaborating with peer efforts outside the US, based on equality and arising from direct, “researcher to researcher” collaborations.

- It is now clear that . . .
 - **GENI, and its allied technologies, are gaining very significant traction**
 - **Strategic level planning** is essential to ensure long term success
 - Both **strategic planning** and **day to day direction** of the GENI project are fulltime jobs
 - The time has come to separate them in order to ensure effective planning for leveraging GENI and the GENI community

- **GENI Futures Director**
strategic level planning for “what comes after GENI,” to maximize the impact and adoption of GENI technology and concepts

- **GENI Project Director**
overall responsibility for GENI’s technical direction and successful implementation
