Airspan BS configuration without Netspan

- Setup sequence reverse engineered and reimplemented from scratch

- For proper testing, we need to reset the BS to factory defaults

➢ How?

wimaxrf development status

Client and BS stats gathering

- Done

- Airspan reports data in bytes, NEC in PDUs

➢ We decided to use bytes everywhere

➢ NEC code must be updated

wimaxrf development status

Client registration

- In progress

OMF 5.4 compatibility

- Porting done (by Ivan)
