- Airspan
  - Live
    - Working with channel allocation
  - GENI Vlan connected
- Omf
  - Separating some shared resources
    - Separate LDAP
    - NFS mounted /home with backup
    - Separted vlans
    - Separate oml
      - Irods server / client on oml machine

- WSA
  - Unresponsive
- Handsets
  - HTC Evo 4g
    - Appears to have reached a dead end
  - Alternative
    - Samsung SII 4G (T-Mobile)
      - Android 4.1.2
      - Configuring WiMAX is easy through drop down menu (##data#)
        - Need to have frequencies added
      - 5Mhz channels still need to be tested
        - Only 10 selectable
