

GENI in the Classroom

# GENI

## Exploring Networks of the Future

**Vicraj Thomas**

[www.geni.net](http://www.geni.net)

## GENI – Exploring future internets at scale

The GENI Concept

Building GENI

Experimental and Classroom use of GENI

What's next for GENI?

GENI: An experimenter's view

# Global networks are creating extremely important new challenges

## Science Issues

We cannot currently understand or predict the behavior of complex, large-scale networks

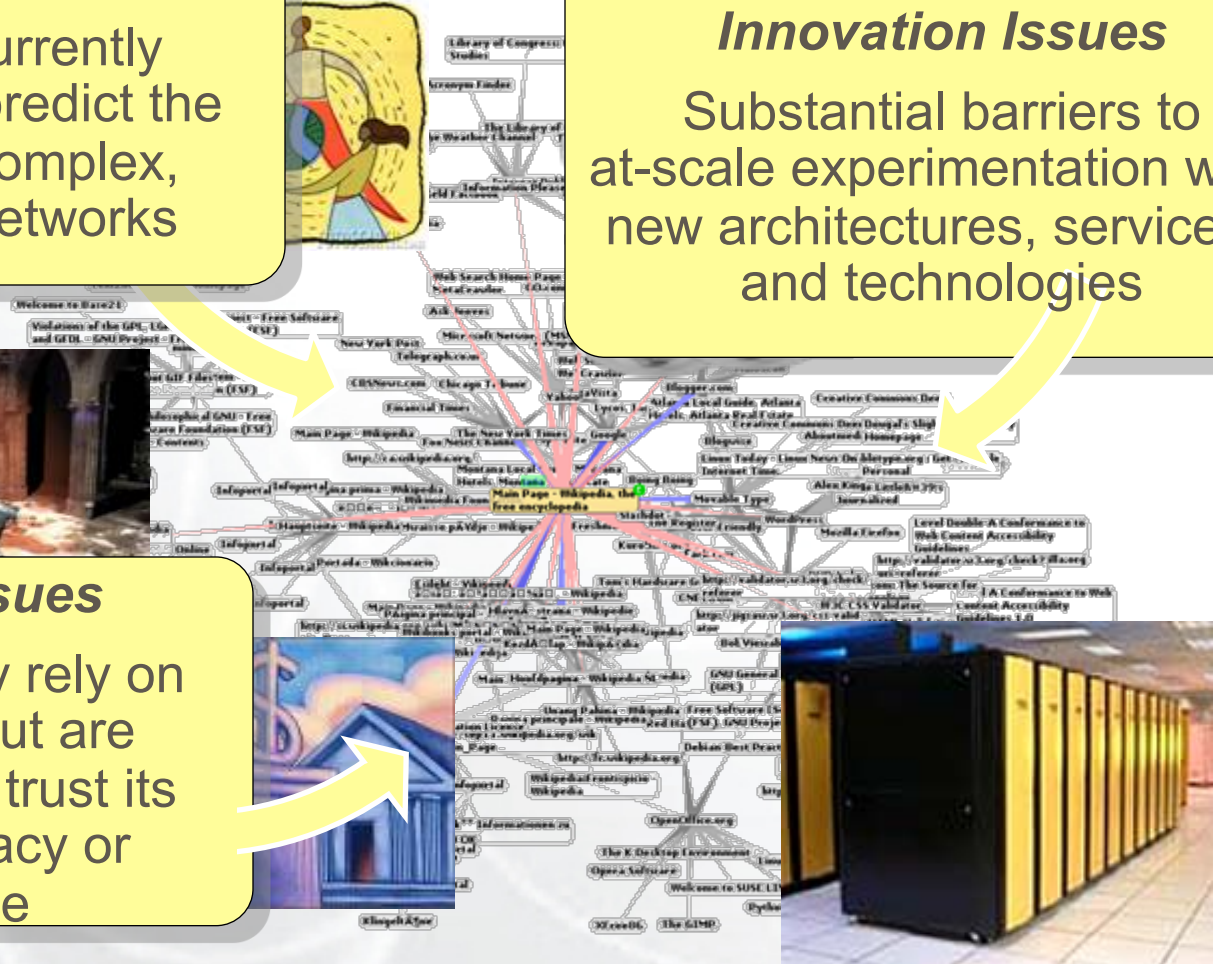

## Innovation Issues

Substantial barriers to at-scale experimentation with new architectures, services, and technologies

## Society Issues

We increasingly rely on the Internet but are unsure we can trust its security, privacy or resilience

# GENI: Infrastructure for Experimentation

## Regional nets

-  Existing
-  New

## GENI WiMAX

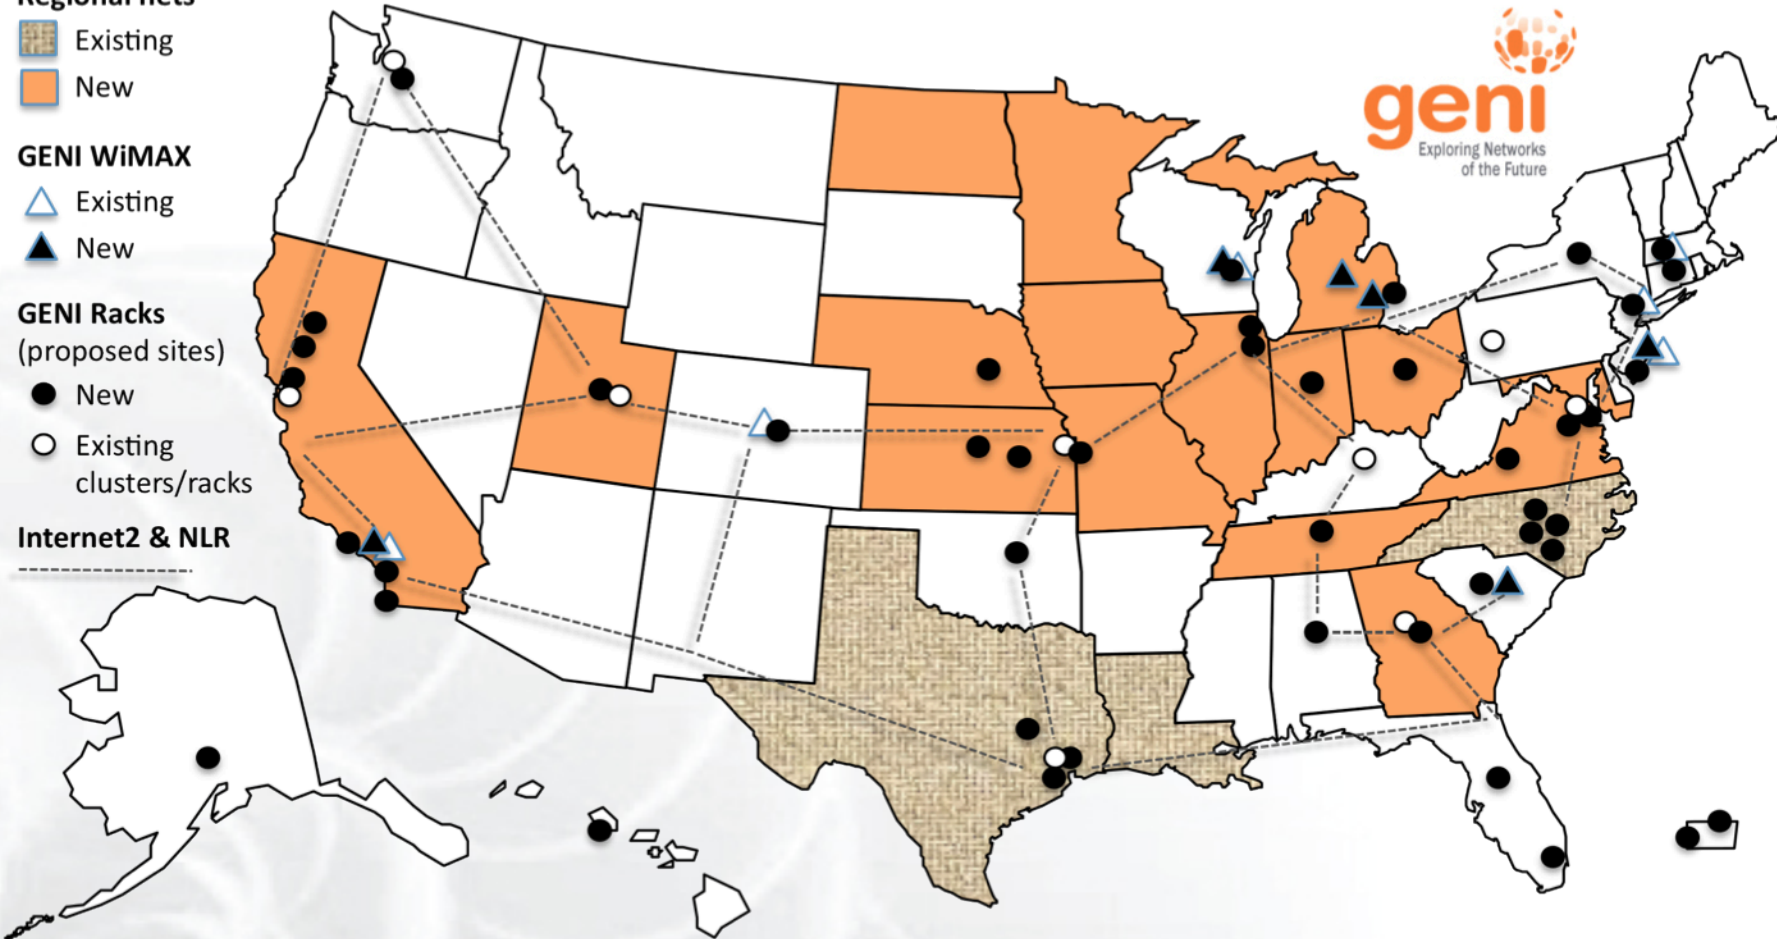

-  Existing
-  New

## GENI Racks (proposed sites)

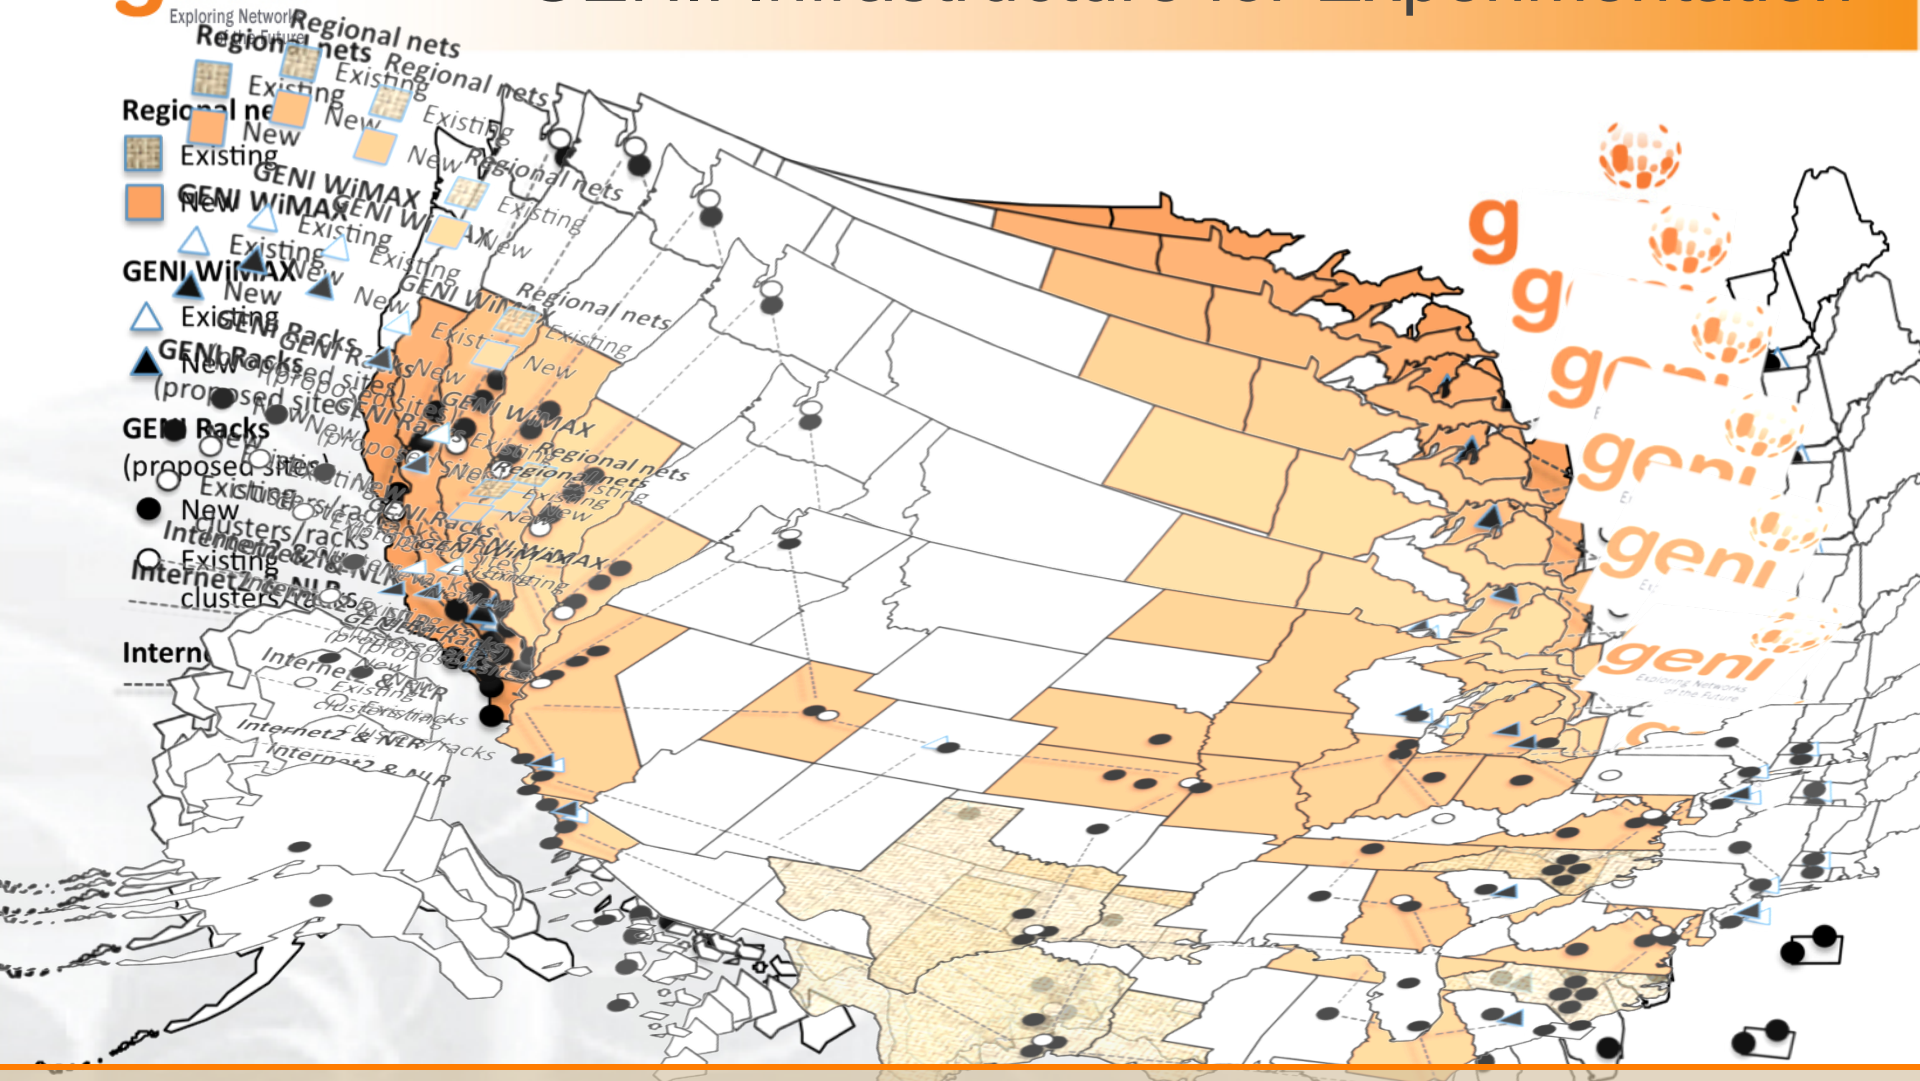

-  New
-  Existing clusters/racks

## Internet2 & NLR

-----

GENI provides compute resources that can be connected in experimenter specified Layer 2 topologies.

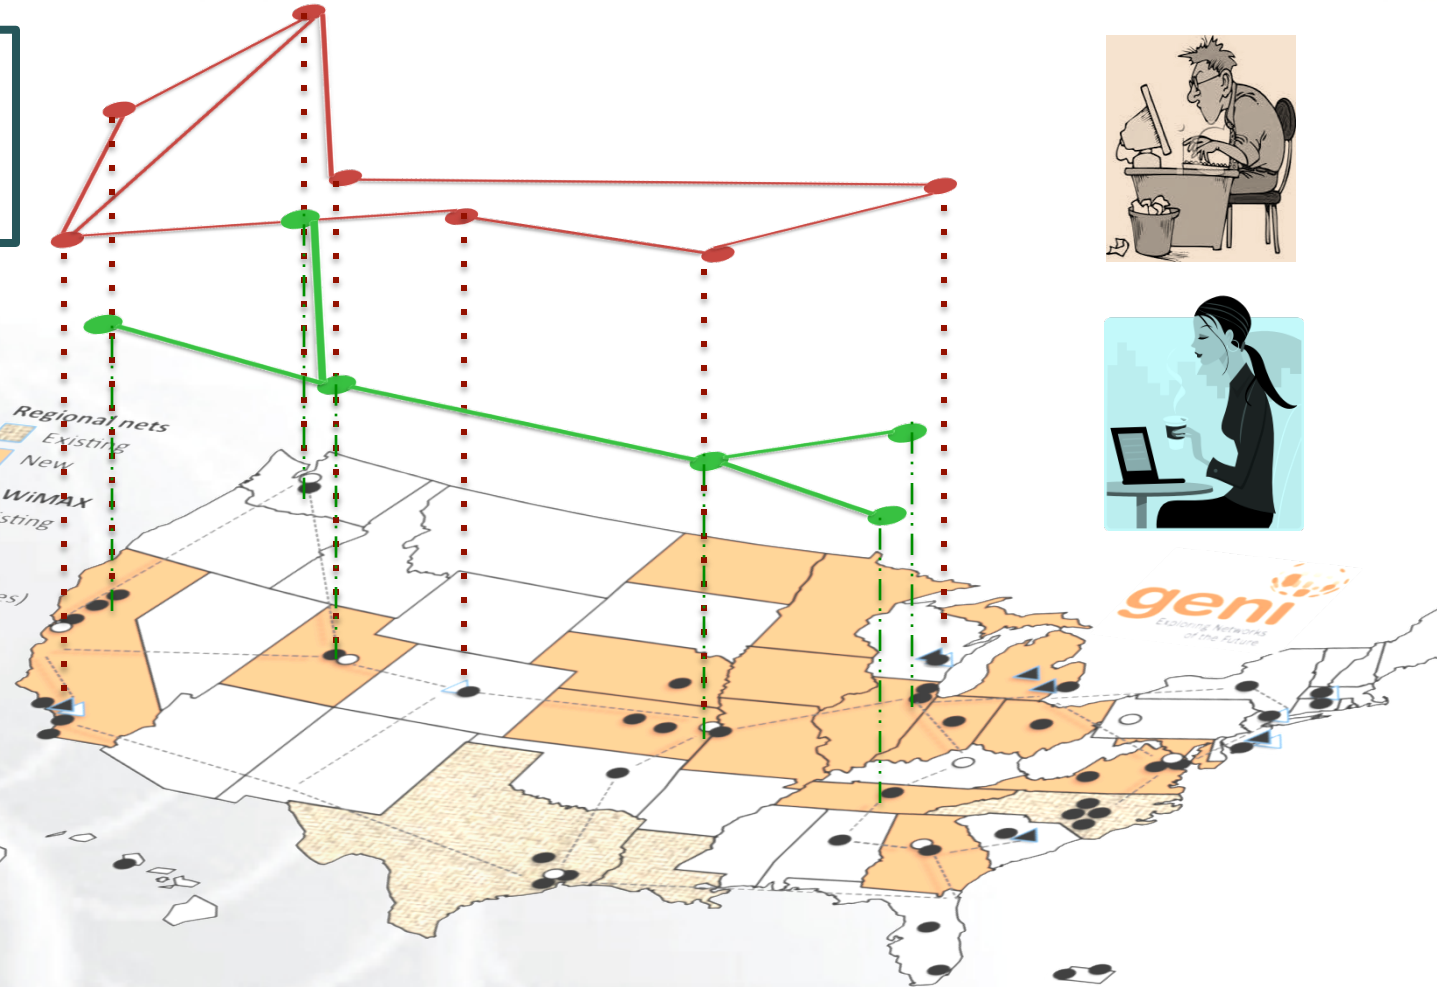

GENI provides compute resources that can be connected in experimenter specified Layer 2 topologies.

Resources can be shared between slices

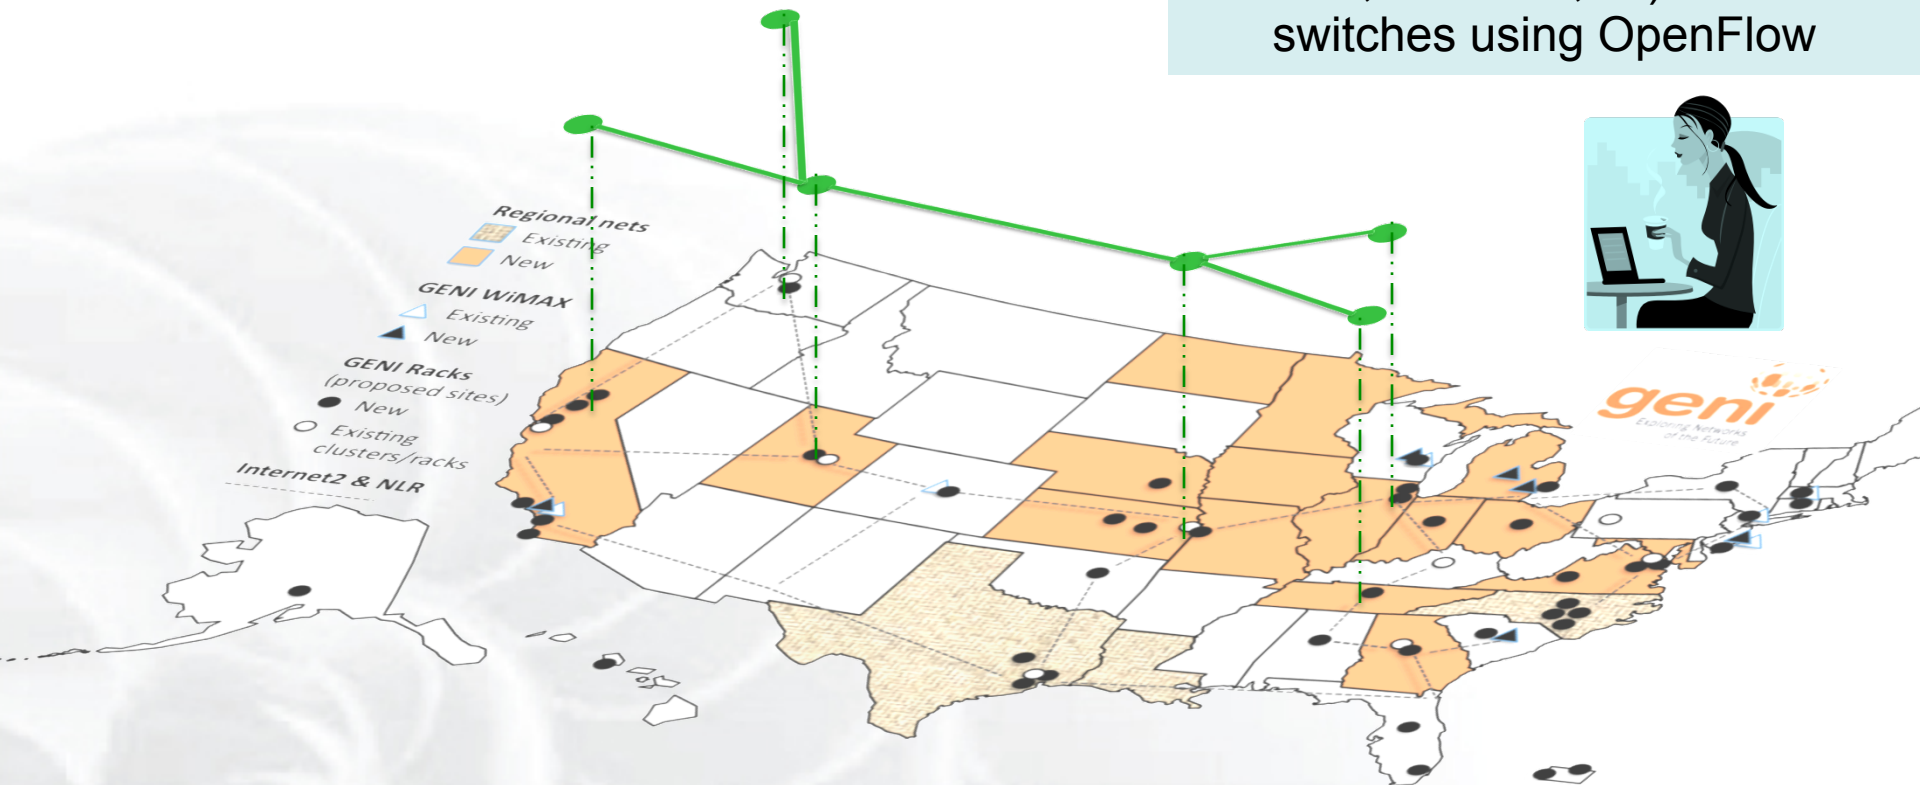

- Regional nets
  - Existing
  - New
- GENI WiMAX
  - Existing
  - New
- GENI Racks (proposed sites)
  - New
  - Existing clusters/racks
- Internet2 & NLR

Experiments live in **isolated “slices”**

# GENI is “Deeply Programmable”

I install software I want throughout my network slice (into routers, switches, ...) or control switches using OpenFlow

Experimenters can set up custom topologies, protocols and switching of flows

Existing Testbeds

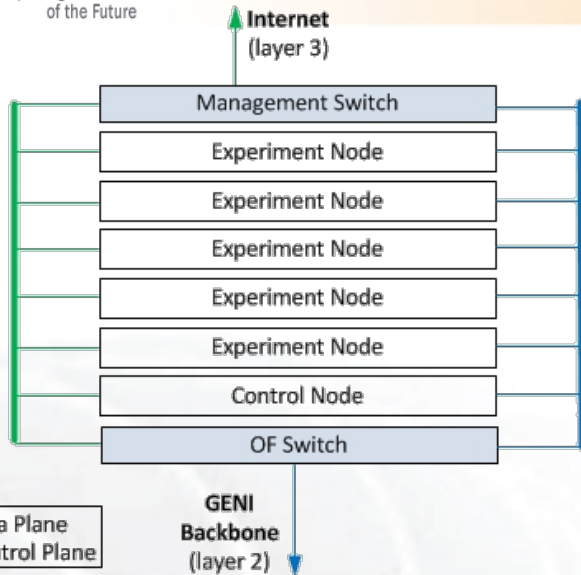

GENI Racks

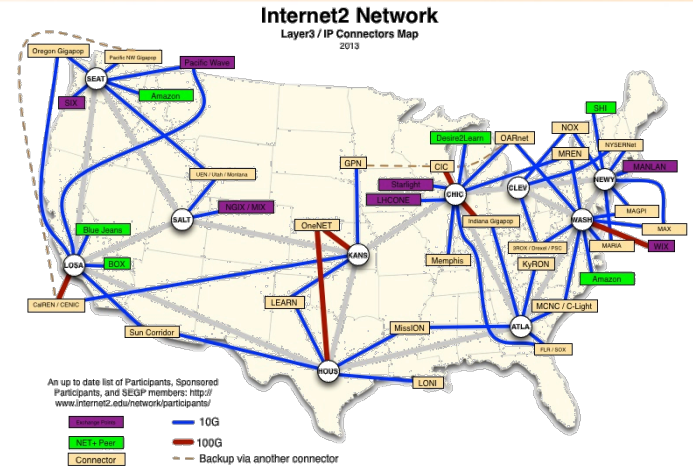

GENI Wireless  
compute nodes

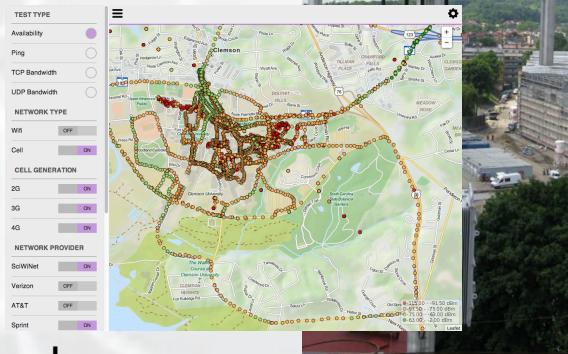

Networking within a Rack

National Research Backbones (e.g. Internet2)

4G/3G GENI network

WiMAX Base Stations

Regional Networks (e.g. CENIC)

GENI – Exploring future internets at scale

The GENI Concept

Building GENI

Experimental and Classroom use of GENI

What's next for GENI?

GENI: An experimenter's view

“I have a great idea.”

“That will never work.”

My new architecture worked great in the lab, so now I'm going to try a larger experiment for a few months.

He uses a modest slice of GENI, sharing its infrastructure with many other concurrent experiments.

# It turns into a really good idea

His slice of GENI keeps growing, but GENI is still running many other concurrent experiments.

“Looks like an app to me.”

“It’s my very own GENI slice.”

“Boy did I learn a lot!”

“What a cool service.”

(I wonder how it works.)

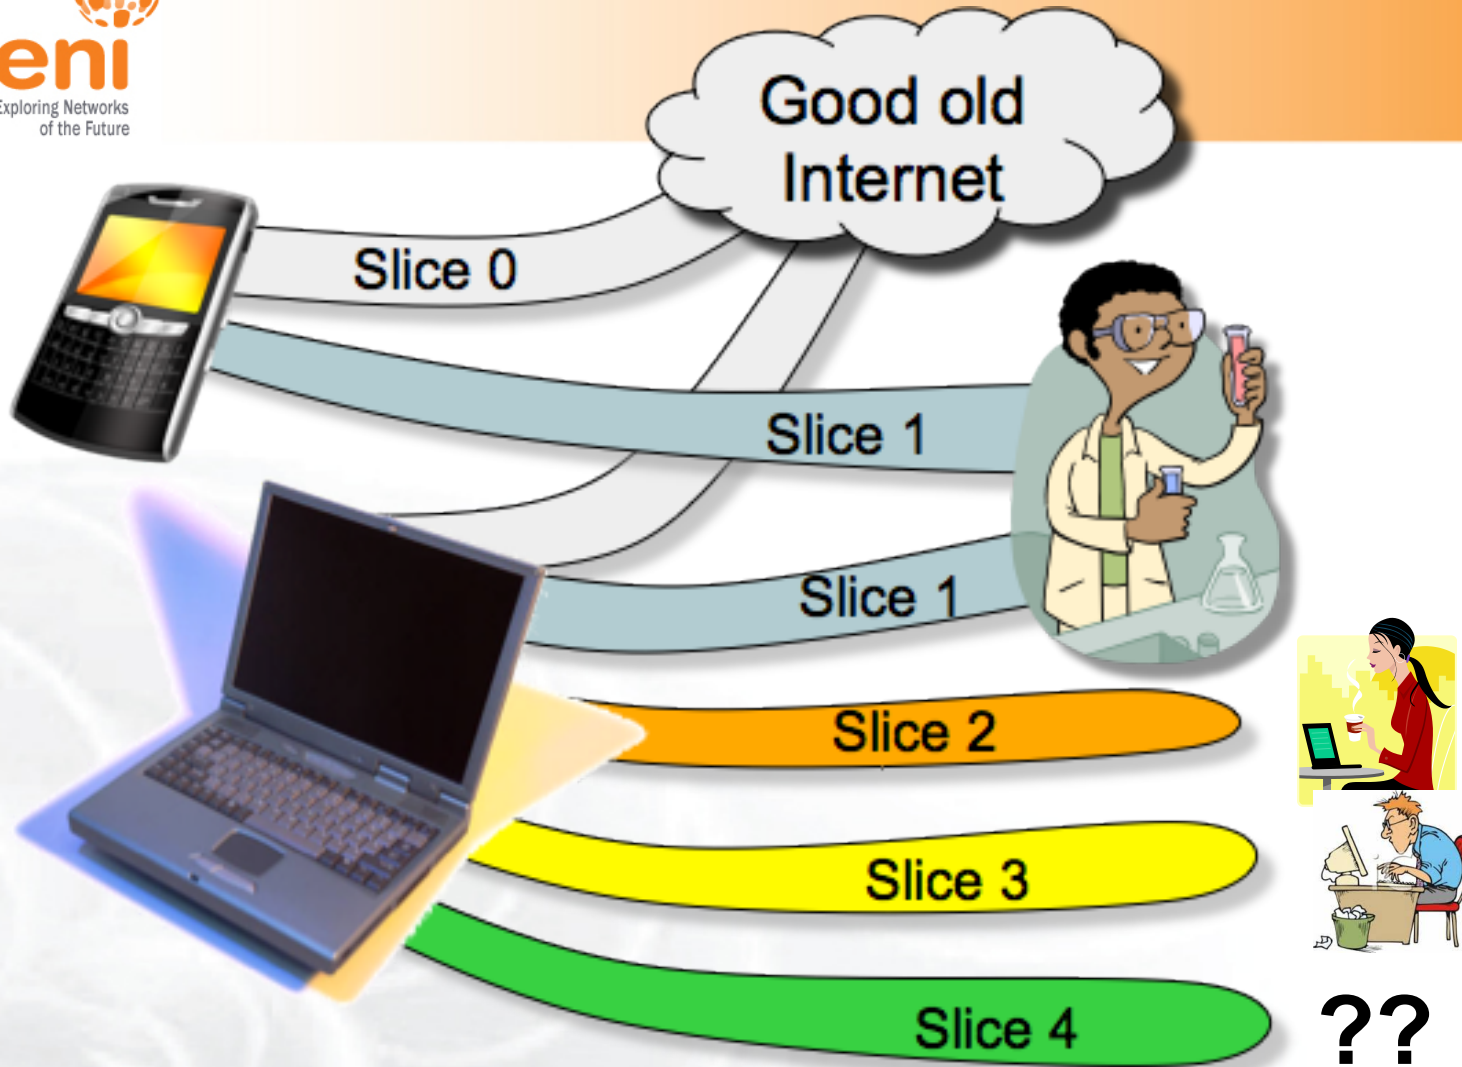

“I always said it was  
a great idea.”

(But way too conservative.)

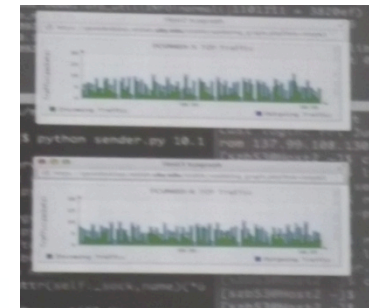

If you have a great idea, check out the  
**NSF CISE research programs for current opportunities.**

GENI is meant to enable . . .

- At-scale experiments
- Internet-incompatible experiments
- Both repeatable and “in the wild” experiments
- ‘Opt in’ for real users
- Instrumentation and measurement tools

**GENI creates a huge opportunity for ambitious research!**

GENI – Exploring future internets at scale

The GENI Concept

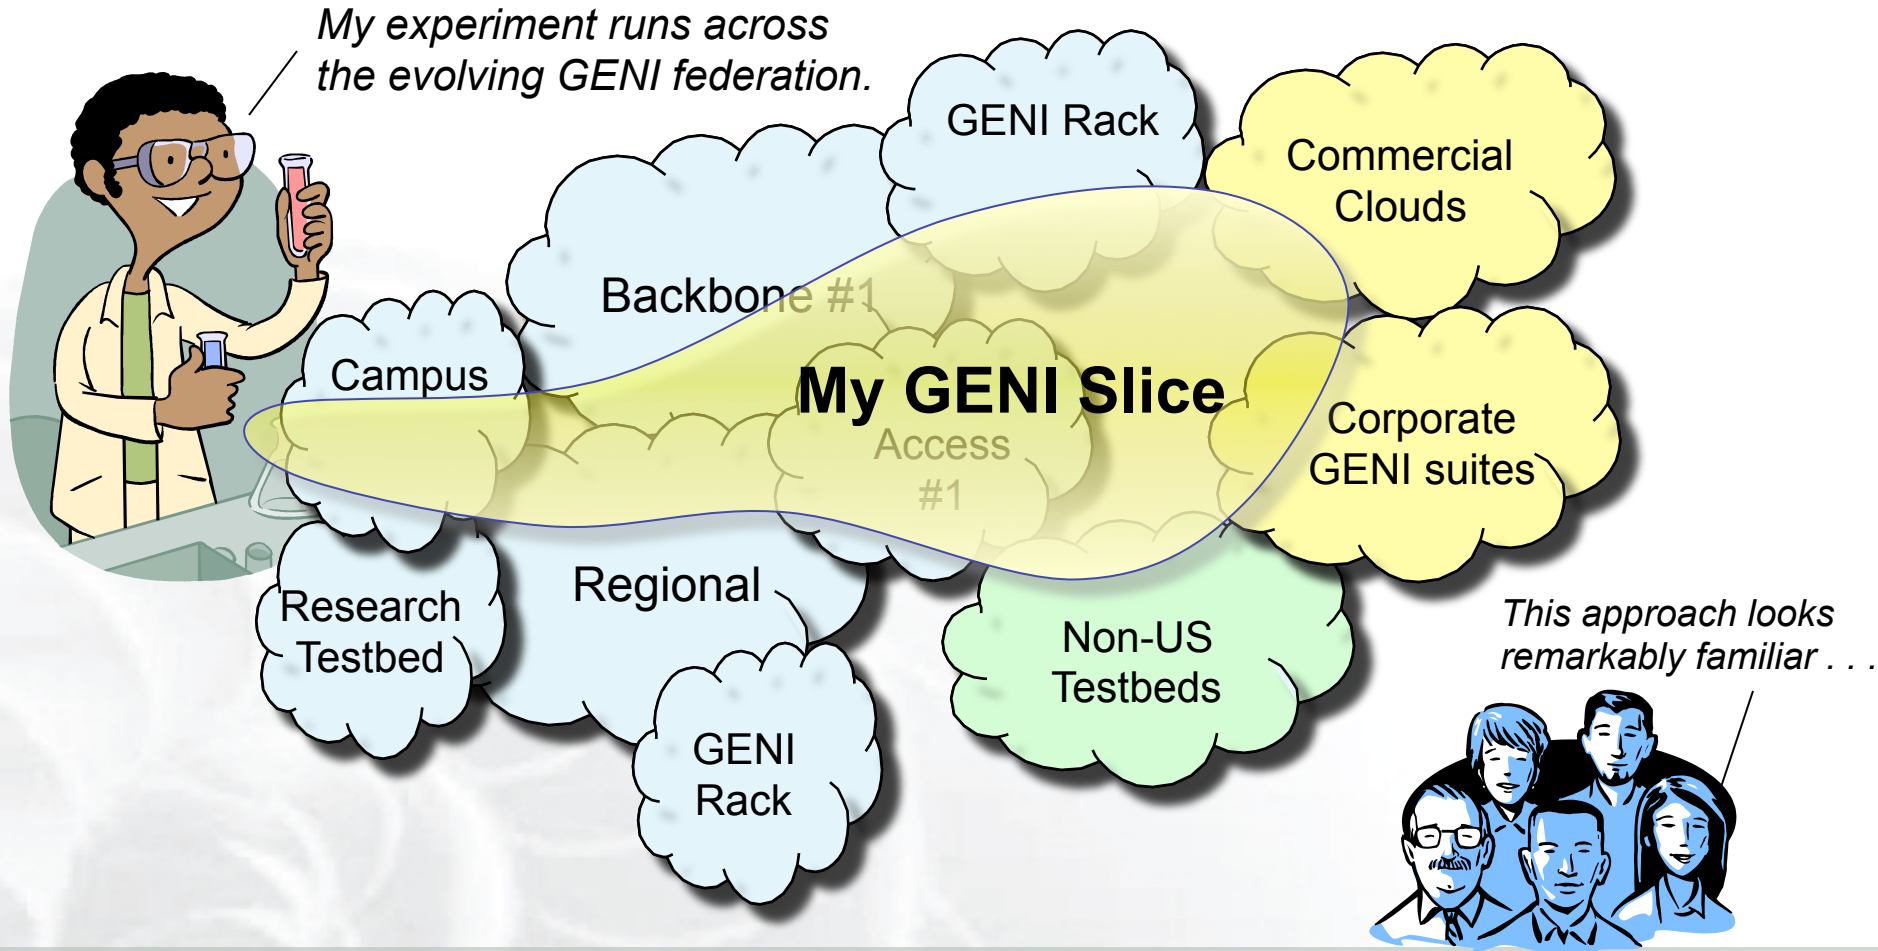

Building GENI

Experimental and Classroom use of GENI

What's next for GENI?

GENI: An experimenter's view

GENI grows by GENI-enabling heterogeneous infrastructure

**Avoid technology “lock in” and grow quickly by incorporating existing infrastructure**

## Regional nets

-  Existing
-  New

## GENI WiMAX

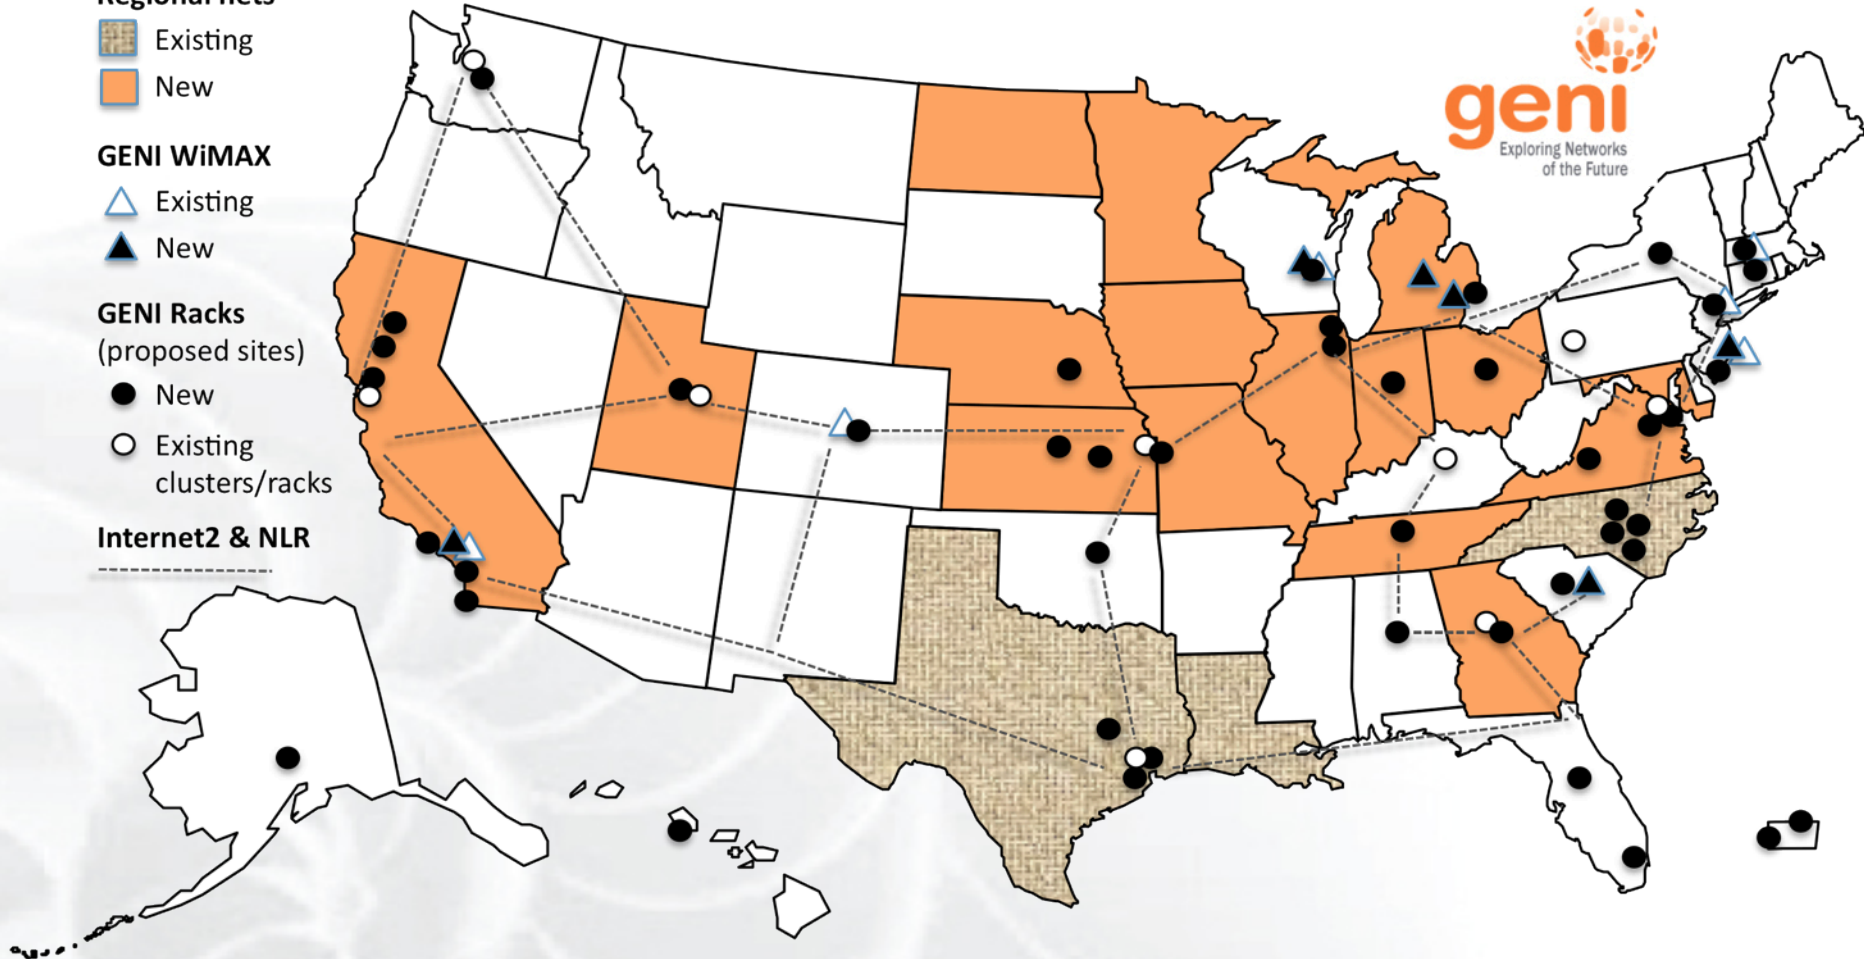

-  Existing
-  New

## GENI Racks

(proposed sites)

-  New
-  Existing clusters/racks

## Internet2 & NLR

## Infeasible to build a testbed as big as the Internet

HP ProCurve 5400 Switch

NEC WiMAX Base Station

GENI-enabled equipment

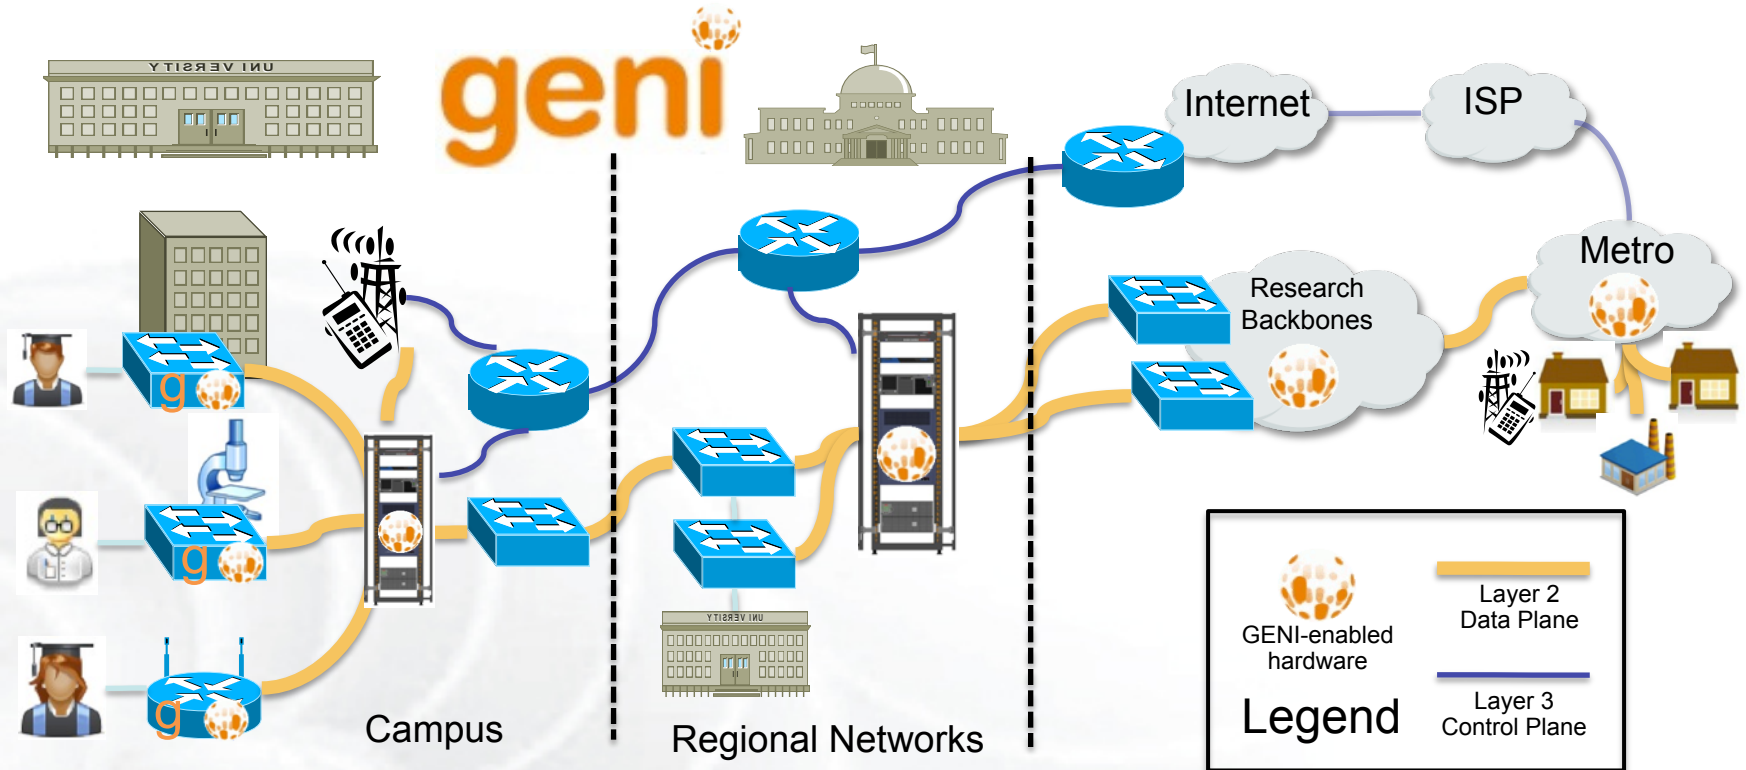

GENI-enabled campuses, students as early adopters

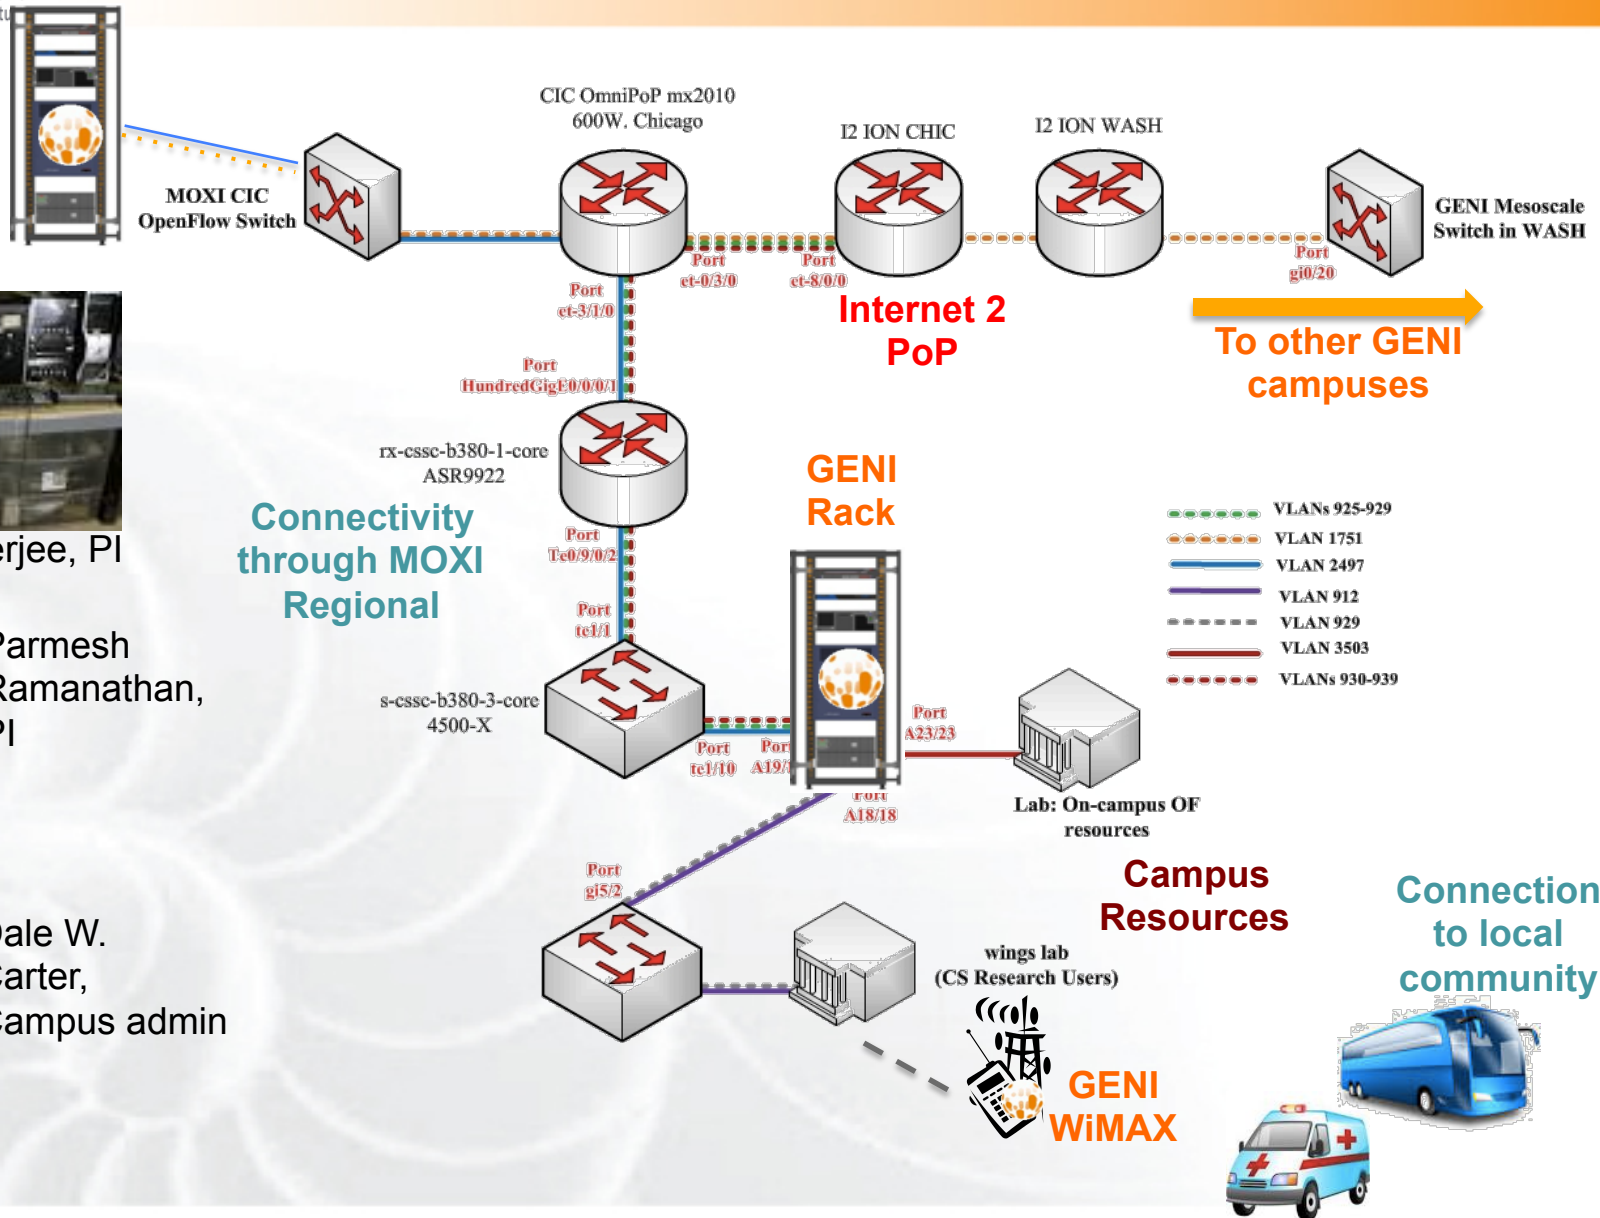

“At scale” GENI prototype

GENI-enable testbeds, commercial equipment, campuses, regional and backbone networks

Campus photo by Vonbloompasha

- Flexible network / cloud research infrastructure
- Distributed cloud (racks) for content caching, acceleration, etc.
- Also suitable for physics, genomics, other domain science

Suman Banerjee, PI

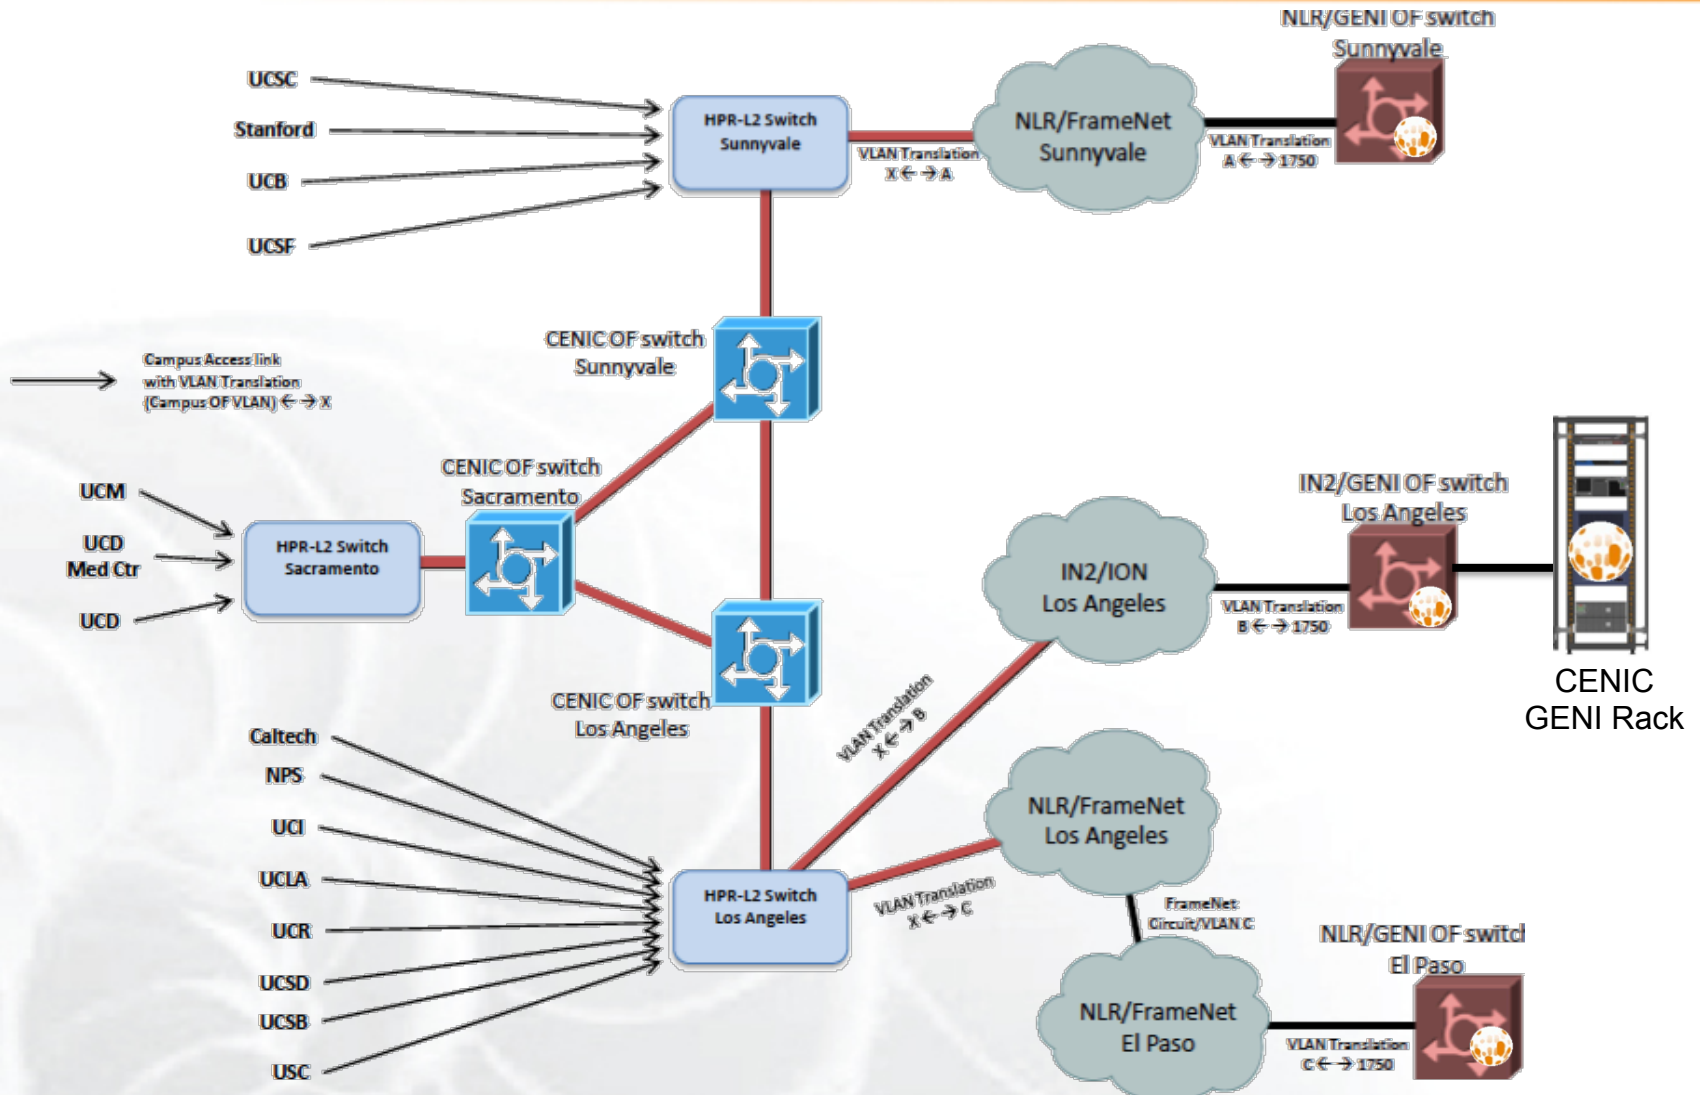

Parmesh Ramanathan, PI

Dale W. Carter, Campus admin

- Collaboration to **implement national-scale infrastructure**
  - sliced and deeply-programmable
  - incorporating OpenFlow/SDN switches, GENI Racks, etc.
  - high-speed (10-100 Gbps)
- Internet2 provides dynamic link provisioning to GENI Experimenters (ION AM)
- In-progress migration from “prototype GENI” to AL2S production system
  - Testing GENI dynamic provision on AL2S AM
  - Testing Experimenter OpenFlow controllers on AL2S

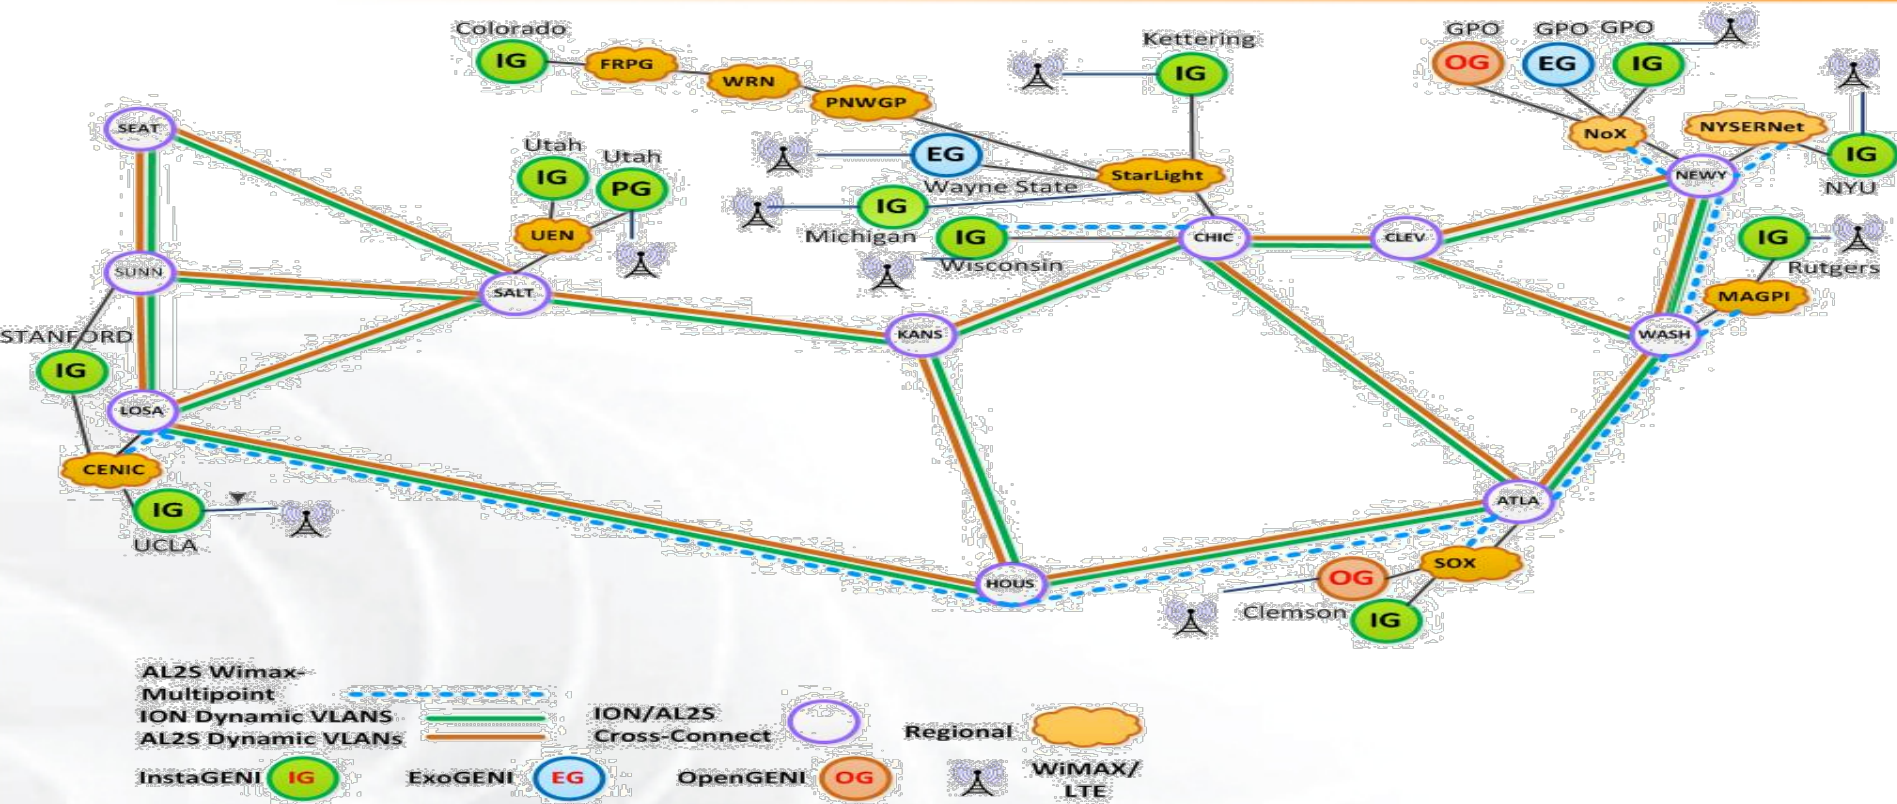

GENI Operations session  
*Wed: 1:30pm – 3:30pm*

- **Agreement with Sprint**
  - Sprint and Rutgers University have signed a **master spectrum agreement**
  - encompassing all WiMAX sites, to ensure **operation in the EBS Band**.
  - An **emergency stop procedure**, in case of interference with Sprint service, has been agreed upon.
- **SciWinet GENI Mobile Virtual Network Operator (MVNO)**
  - Partner with Sprint and Arterra (a Sprint partner) to create and operate an (**MVNO**) that serves the academic research community
  - The effort is led by Jim Martin and Ivan Seskar, to learn more:  
<http://sciwinet.org>

WiMAX Developers session  
*Wed: 11:30pm – 12:30pm*

- 26 Wimax Base Stations in 13 Sites
- 90 android handsets available to experimenters
- 36 wireless (yellow) nodes
- Uniform experimenter experience using yellow nodes
- Sliced, virtualized and interconnected through Internet2

- 26 Wimax Base Stations in 13 Sites
- 90 android handsets available to experimenters

- Sliced, virtualized and interconnected through Internet2

## **GMOC: GENI Meta-operation Center**

- Keeps track of outages
- Notification system for resource reservation
- Monitors most GENI Aggregates
- Coordinates LLR Requests
  - Legal Law Enforcement & Regulatory
- Handles Emergency Stop

**GMOC Calendar tracks reservations/outages**

**For emailed notifications: [experimenter-ops](mailto:experimenter-ops)\***

<https://mail1.gnoc.iu.edu/mailman/listinfo/experimenter-ops>

**Ilia Baldine**  
**RENCI**  
More resources / rack,  
fewer racks

**Rajesh Narayanan**  
**DELL**

**KC Wang** Clemson

Latest addition

**Rick McGeer**  
**HP Labs**

Fewer resources / rack,  
more racks

GENI – Exploring future internets at scale

The GENI Concept

Building GENI

Experimental and Classroom use of GENI

What's next for GENI?

GENI: An experimenter's view

## Research

- Future Internet Architectures
- Software defined networking
- Large scale evaluation of protocols
- Cloud networking
- Domain sciences

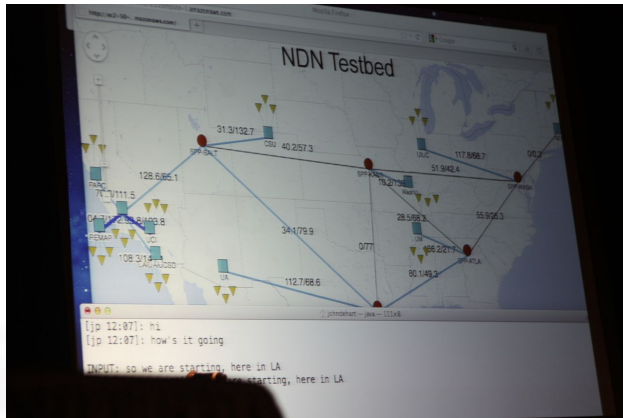

## Education

- Classes in:
  - Computer Networking
  - Distributed systems
  - Cloud computing
  - Wireless Communications
- Undergraduate, graduate

**As of October 2014, GENI has over 2700 users!**

# Three FIA Teams have Slices on GENI

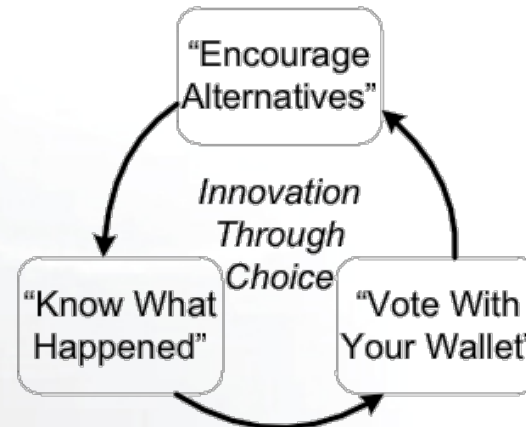

**NDN (tutorial Wed @ 1.30pm)**

**XIA (tutorial @ today @10.30am)**

**MobilityFirst (tutorial today @ 3.30pm)**

**ChoiceNet (tutorial today @ 3.30pm)**

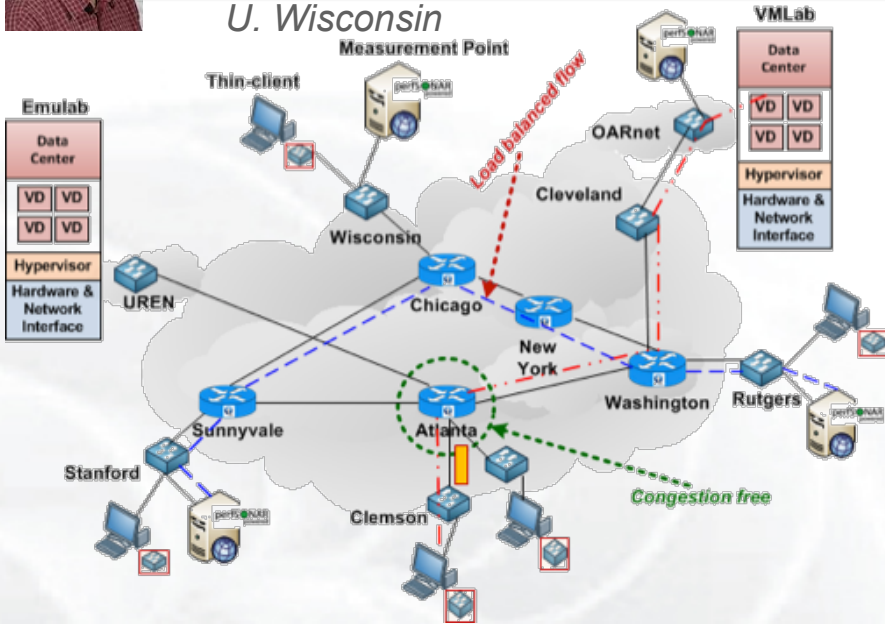

**GENI is the only testbed that can support these teams.**

*Parmesh Ramanathan  
U. Wisconsin*

*KC Wang  
Clemson U.*

**GENI Cinema**

Improve in-time weather forecasting using **Software Defined eXchanges**

*Mike Zink  
Umass Amherst*

**GENI is the largest multi-domain SDN testbed**

# US Ignite: Builds application of the future

US Ignite promotes advanced applications and infrastructure leveraging GENI research and technologies.

## Over 50 classes have used GENI

- Undergrad level
- Graduate level
- Used Internationally

## Ready-to-use tutorials assignments

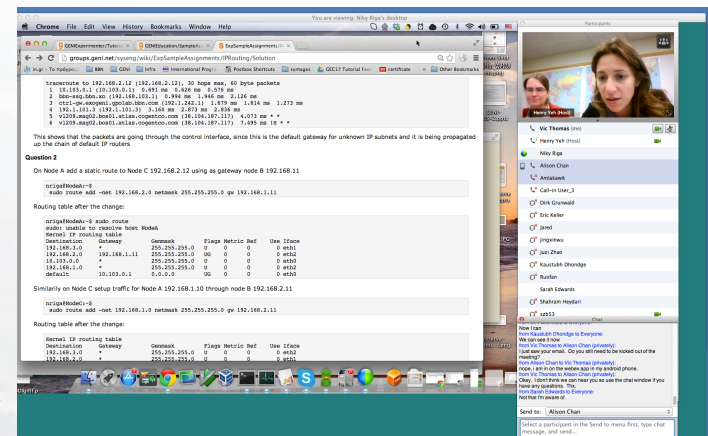

- Teach how to use GENI
- Teach networking concepts
- Teach distributed computing concepts
- Teach programmable networks

## Train-the-TA tutorials

- Start of each semester
- Taught over WebEx

*Jeannie Albrecht (Williams College) with students from her Spring 2012 Distributed Systems class*

**Train-the-TA Webinar**

# GENI in the Classroom – A great success!

*Jeannie Albrecht  
(Williams College)  
with students from  
her Spring 2012  
Distributed  
Systems class*

## **Spring 2014 (15 classes):**

Jeanne Albrecht (Williams College)  
Suman Banerjee (U. of Wisconsin)  
Baek-Young Choi (U. of Missouri-Kansas City)  
Zongming Fei (U. of Kentucky)  
Deniz Gurkan (U. of Houston)  
Thanasis Korakis (NYU Poly)  
Yaoqing Liu (Clarkson U.)  
Shivendra Panwar (NYU Poly)  
Robert Ricci (U. of Utah)  
Carolyn Sher-Decusatis (City U. of New York)  
Violet Syrotiuk (Arizona State U.)  
Bing Wang (U. of Connecticut)  
KC Wang (Clemson U.)  
*Vasillis Maglaris (NTUA Greece)*  
*Gaia Maselli (Sapienza University of Rome – Italy)*

## **Fall 2013:**

Suman Banerjee (U. of Wisconsin)  
Prasad Calyam (U. of Missouri)  
Zongming Fei (U. of KY)  
John Geske (Kettering U.)  
Deniz Gurkan (U. of Houston)  
Christos Papadopoulos (Col. State)  
Henning Schulzrinne (Columbia U.)  
Violet Syrotiuk (Arizona State U.)  
Zhi-Li Zhang (U. of MN)

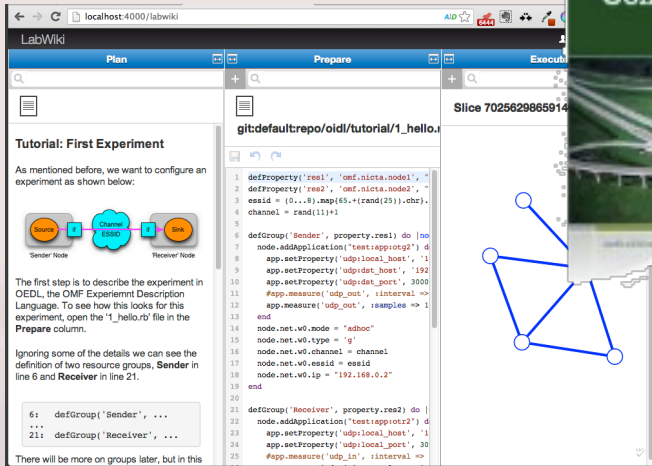

## **Spring 2013:**

Jay Aikat (U. of NC)  
Rudra Dutta (NCSU)  
Khaled Harfoush (NCSU)  
Jelena Marasevic (Columbia U)  
Parmesh Ramanathan (U. Wisc)  
Violet Syrotiuk (Arizona State U.)  
KC Wang (Clemson)  
Michael Zink (U. of MA)

## **Fall 2012:**

Rudra Dutta (NCSU)  
Zongming Fei (U. of KY)  
Fraida Fund (NY Poly)  
Kaiqi Xiong (RIT)

# GENI in the Classroom – Moving Forward

Federation fosters International Collaborations

GENI – Exploring future internets at scale

The GENI Concept

Building GENI

Experimental and Classroom use of GENI

What's next for GENI?

**GENI: An experimenter's view**

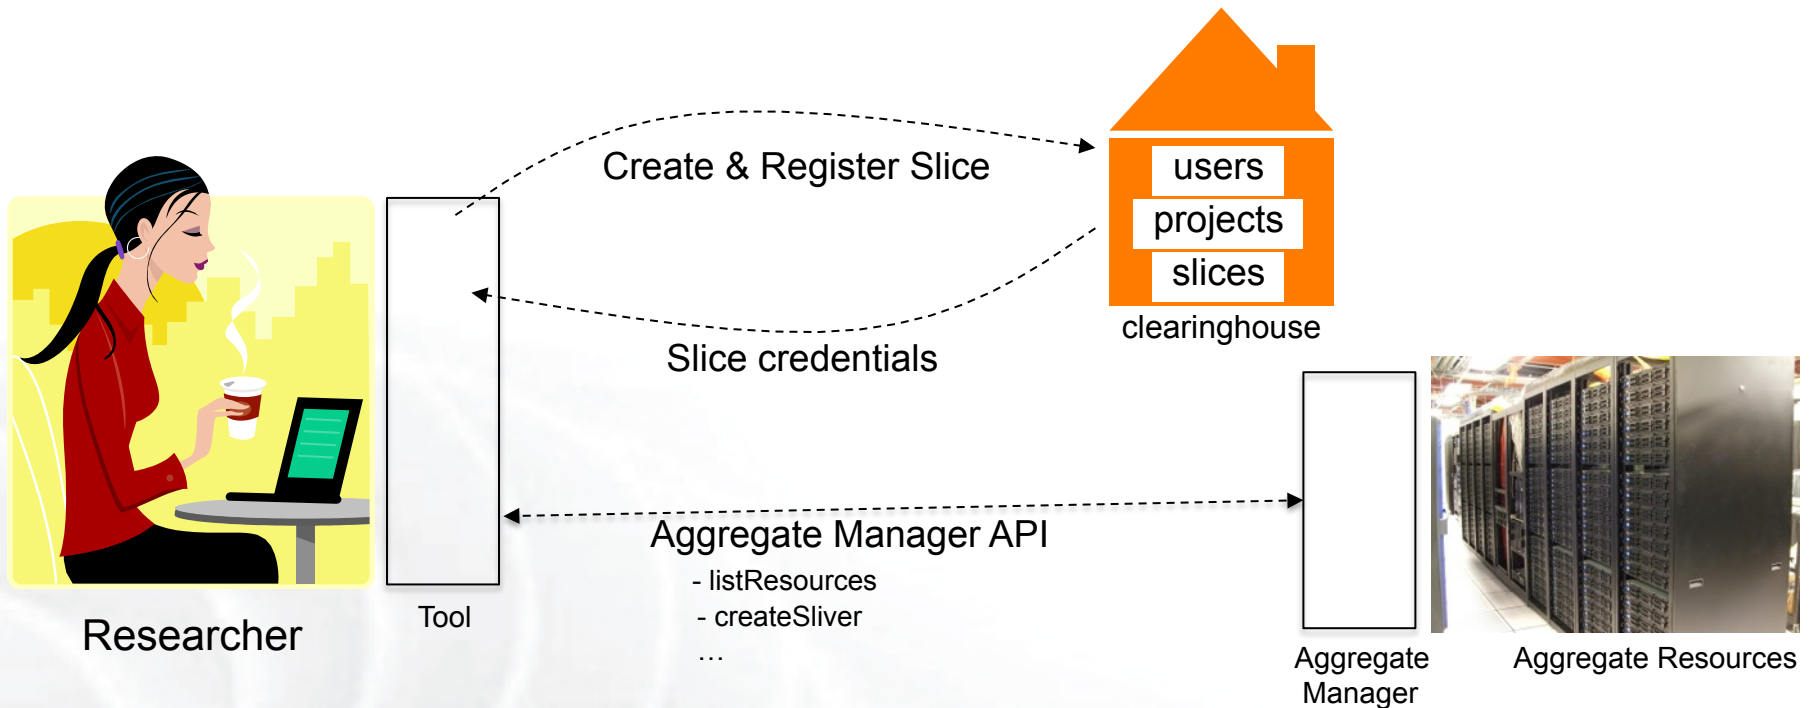

## Slice

Abstraction for a collection of resources capable of running experiments

- An experiment uses resources in a slice
- Slices isolate experiments
- Experimenters are responsible for their slices

- **Clearinghouse: Manages users, projects and slices**
  - Standard credentials shared via custom API or new Common CH API
  - GENI supported accounts: GENI Portal/CH, PlanetLab CH, ProtoGENI CH
- **Aggregate: Provides resources to GENI experimenters**
  - Typically owned and managed by an organization
  - Speaks the GENI AM API
  - Examples: PlanetLab, Emulab, GENI Racks on various campuses

# GENI User Authentication

The GENI Portal leverages InCommon for single sign-on authentication

**InCommon**<sup>®</sup>

Experimenters from 304 educational and research institutions have InCommon accounts

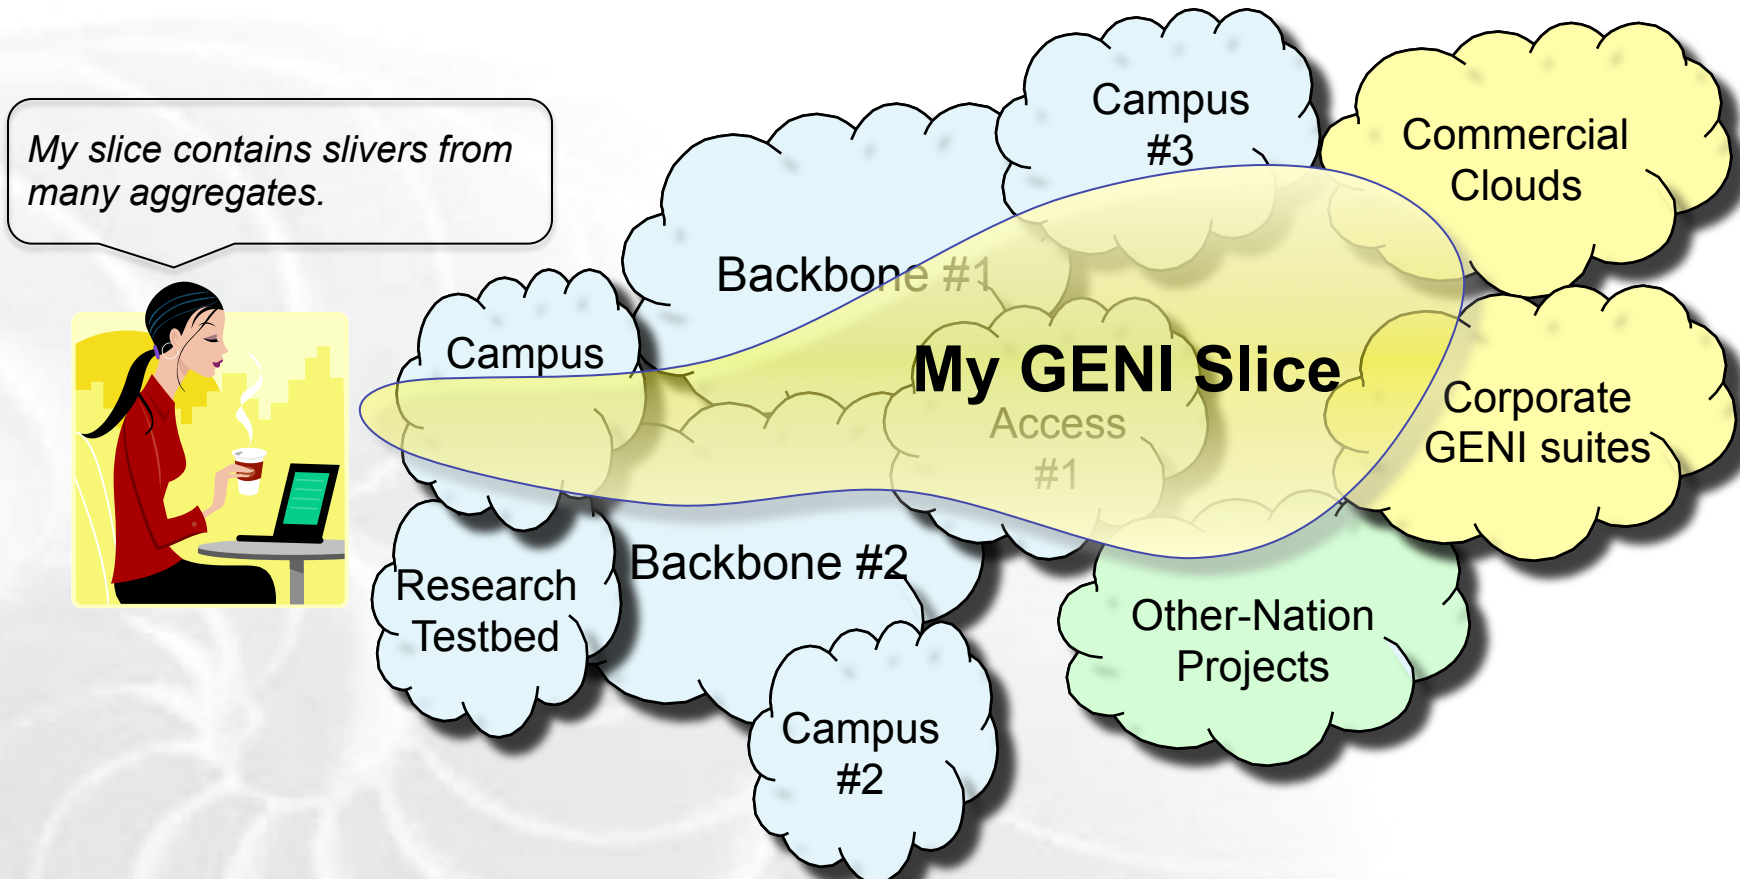

For many experimenters:

- no new passwords
- familiar login screens

**GENI Project Office** runs a federated IdP to provide accounts for non-federated organizations.

- Sliver: One or more resources provided by an aggregate
  - E.g. Bare machines, virtual machines, VLANs

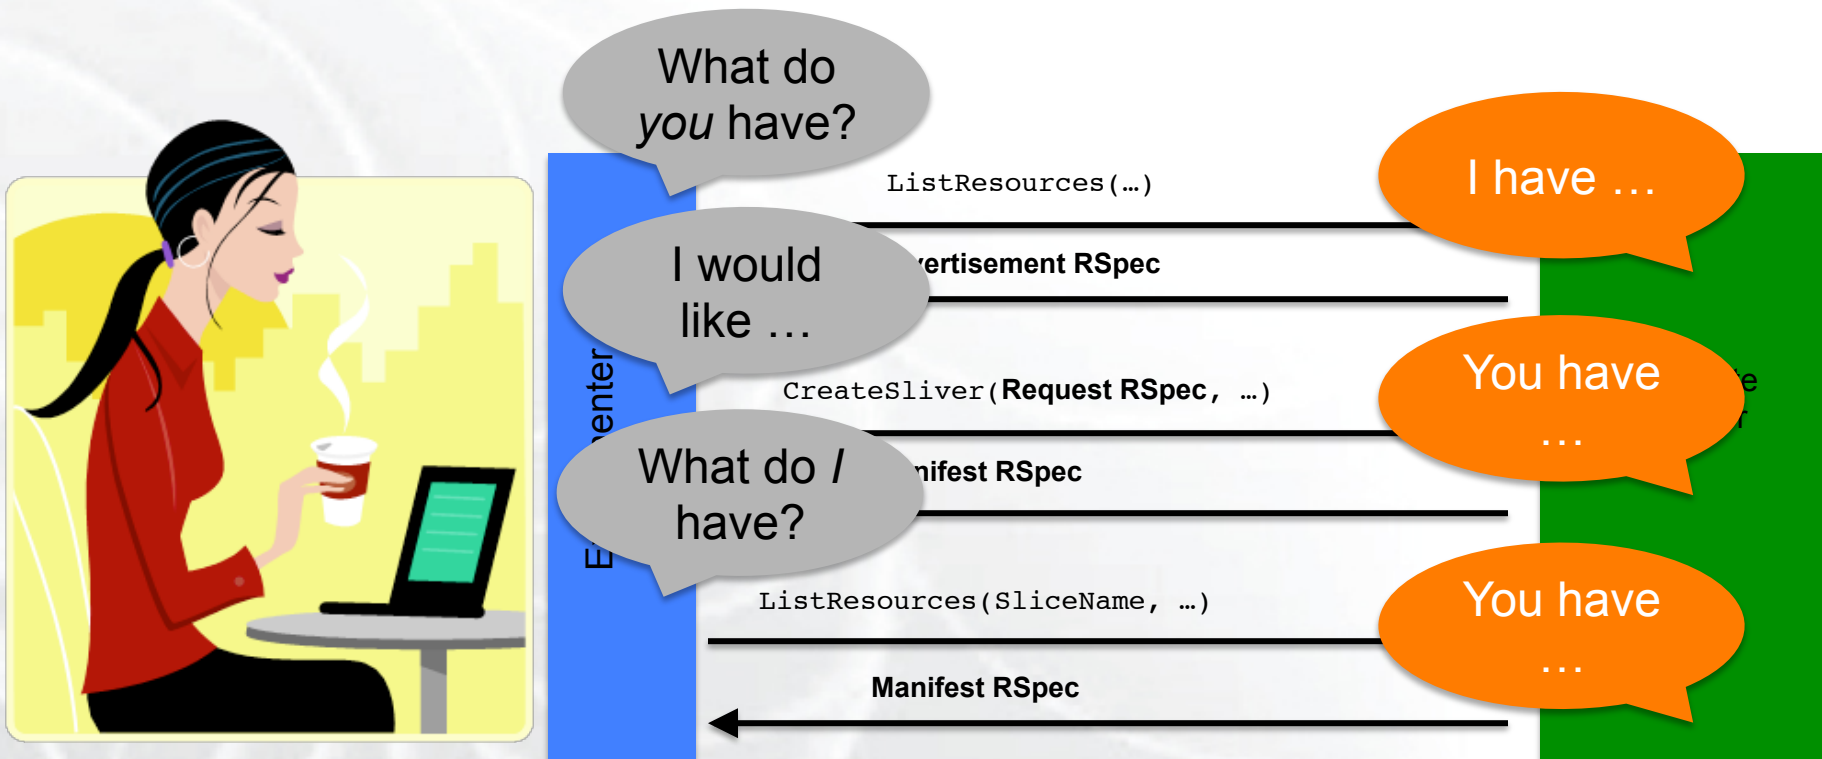

- RSpecs: Lingua franca for describing and requesting resources
  - “Machine language” for negotiating resources between experiment and aggregate
  - Experimenter tools eliminate the need for most experimenters to write or read RSpec

```
<?xml version="1.0" encoding="UTF-8"?>
<rspec xmlns="http://www.protogeni.net/resources/rspec/2"
  xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance"
  xsi:schemaLocation="http://www.protogeni.net/resources/rspec/2
    http://www.protogeni.net/resources/rspec/2/request.xsd"
  type="request" >
  <node client_id="my-node"
    exclusive="true">
    <sliver_type name="raw-pc" />
  </node>
</rspec>
```

**RSpec for requesting a single node**

# Reserving Resources using RSpecs and the AM API

- Experimenter tools and aggregates talk to each other using resource specifications (**RSpecs**) and the GENI Aggregate Manager API (**GENI AM API**)
- Advertisement RSpec: What does an aggregate have?
- Request RSpec: What does the experimenter want?
- Manifest RSpec: What does the experimenter have?

- Demo
  - Login to the GENI Portal
  - Create a slice
  - Create a sliver at one aggregate
    - Two computers (VMs), connected by a LAN
  - Install and run software on the machines
  - View output of software
  - Delete sliver
- Experimenter tool: Jacks

- Login to GENI Experimenter Portal
- Create slice
- Launch Flack
- Draw topology
- Create sliver
- Verify sliver creation was successful

Get slices: Completed v17.26

## Welcome to GENI

GENI is a new, nationwide suite of infrastructure supporting "at scale" research in networking, distributed systems, security, and novel applications. It is supported by the National Science Foundation, and available without charge for research and classroom use.

Use GENI

### Find out more about using GENI

- [Information for GENI experimenters](#)
- [Published research that used GENI resources](#)
- Get [help](#) using GENI

These are some of the many resources being used in GENI experiments across the country.

*GENI is sponsored by the  National Science Foundation*

Online: <https://portal.geni.net>

# Students need a professor to create a GENI project

Newcomers BoF Dinners		Poster/Demo Session (5.30pm - 7.30pm) <b>CyberInfrastructure Building</b>		BoF Dinners		BoF Dinners		BoF Dinners		BoF Dinners		BoF Dinners		BoF Dinners		BoF Dinners					

Legend	
	General interest
	Experimenter targeted
	Developer targeted
	Experimenter and developer targeted
	Campus IT/Rack administrator targeted
	Recommended for newcomers
	Hands-on Tutorial; Bring a laptop if you want to do the hands-on exercises
*	Session topics relate to theme <b>Future Internet Architectures (FIA)</b>
#	Session topics relate to theme <b>Scripting Experiments</b>

# GENI Engineering Conferences

## We welcome your participation in GENI

- **22<sup>nd</sup> meeting, open to all:**  
**March 23-26, 2015, Washington, DC**
  - Planning & discussion for experimenters, software, infrastructure
  - Tutorials and workshops
  - **Travel grants** to US academics for participant diversity

# QUESTIONS?
