

Lindsey Frost
Mozilla Foundation

I'm afraid I don't have much to add by way of comments, other than to reemphasize how impactful the GENI-enabled 4K microscopy project has been for our community in CHA. As I consider the future of the Mozilla Gigabit Community Fund, I'm thrilled about how GENI could make possible more such cross-city collaborations, and I'm eager to continue working together to push forward our shared mission however we can.
