 - Quilt Regional Networks status update (Jen Leasure)
 - others as time permits Your text goes here

GENI Recommended Use Policy excerpt

<http://groups.geni.net/geni/wiki/RUP>

"GENI does not allow illegal activities."

At GEC4, working group asked for lawyer's input on what "illegal" meant. Cordell Thorn from GPO reviewed and responded that it refers to U.S. law only.

Since this was the only open issue, I propose we post the (unchanged) "final" policy to the mailing lists with a recommendation that GENI adopt the policy.
